## 1. Executive Summary

This document identifies all the data that are needed as input to perform the LST\_CCI project, including:

- ❖ all Level 1 satellite products from ESA and Third Party Missions for LST ECV development
- ❖ all ancillary data
- ❖ all in situ observation data sources for validation
- ❖ higher-level products for product intercomparison and climate assessment

The LST\_CCI consortium is responsible for obtaining all input data for use within the LST\_CCI project. Most input data are available via FTP, SFTP or HTTP for external parties to obtain from source. The LST\_CCI consortium will provide necessary data outside the project team within deliverable data packages (RRDP and CRDP). LST output products from the project in ESA CCI format will be distributed from the ESA CCI Open Data Portal.

This Data Access Requirements Document (DARD) is effectively a live document, which will be updated as new information on datasets is available. Version 3.0 contains updates to the usage of data in product development, additional data for Phase-2.

## 2. Introduction

This Data Access Requirements Document (DARD) identifies all data that are needed as input to perform the LST\_CCI project. In this document we outline the data required (including version number and references), give information about spatio-temporal coverage, availability, estimates of dataset size, and how the data is to be used in the LST\_CCI project.

### 2.1. Structure of the Document

After this introduction, the document is divided into a number of major sections that are briefly described below:

- ❖ **Section 2:** Definition of table fields
  - This section provides definitions of the table fields used throughout the rest of the document.
- ❖ **Section 3:** Summary of data sets required
  - This section lists all the data products required by the LST\_CCI project. The information in this section identifies the product, its version number, the original source, the date the product is first required by the project, the sub-set of the record required, where the data can be obtained and the size of the data set.
- ❖ **Sections 4 to 8**
  - These sections provide further information about the data products listed in Section 3. For each data source the DARD includes:
    - ◆ information about the original source of the data
    - ◆ identification of the data type
    - ◆ the sensor type and key technical characteristics
    - ◆ information about data availability and coverage
    - ◆ the product name and reference to product technical specification documents
    - ◆ estimates of data quantity (total)
    - ◆ indication of data quality and reliability
    - ◆ description of the ordering and delivery mechanism
    - ◆ identification of access conditions and pricing
    - ◆ details of any formal agreements with data suppliers for delivery of the data product to the project.
    - ◆ any requirements for resolving issues concerning data access, calibration, validation and performance issues specific to the ground segment should they exist any potential algorithm upgrades that would enable the regeneration of improved input products for the LST ECV.

### 2.2. Reference Documents

The following is a list of documents with a direct bearing on the content of this report. Where referenced in the text, these are identified as RD-xx, where 'xx' is the number in the table below.

## 2.4. Glossary

The following terms have been used in this report with the meanings shown.

| Term        | Definition   |
|-------------|--|
| AATSR       | Advanced Along-Track Scanning Radiometer   |
| AMSR-E      | Advanced Microwave Scanning Radiometer for EOS   |
| AMSR2       | Advanced Microwave Scanning Radiometer 2   |
| ASTER       | Advanced Spaceborne Thermal Emission and Reflection Radiometer   |
| ATSR        | Along-Track Scanning Radiometer  |
| AVHRR       | Advanced Very High Resolution Radiometer   |
| AWI         | Alfred-Wegener-Institut  |
| CAMEL       | Combined ASTER and MODIS Emissivity database over Land   |
| CEDA        | Centre for Environmental Data Analysis   |
| CM SAF      | Satellite Application Facility on Climate Monitoring   |
| CIMSS       | Cooperative Institute for Meteorological Satellite Studies database of monthly land surface emissivity |
| DARD        | Data Access Requirements Document  |
| DEM         | Digital Elevation Model  |
| EASE-grid   | Equal-Area Scalable Earth Grid   |
| ECMWF       | The European Centre for Medium-Range Weather Forecasts   |
| ECV         | Essential Climate Variable   |
| ERA5        | ECMWF Reanalysis 5   |
| ERA-Interim | ECMWF Reanalysis - Interim   |
| ESA         | European Space Agency  |
| FCOVER      | Copernicus Global Land Fraction of Vegetation Cover dataset  |
| FTP         | File Transfer Protocol   |
| GEO         | Geostationary Earth Orbit  |
| GOES        | Geostationary Operational Environmental Satellite  |
| HTTP        | HyperText Transfer Protocol  |
| IASI        | Infrared Atmospheric Sounding Interferometer   |
| ISCCP       | International Satellite Cloud Climatology Project  |
| IGKB        | International Commission for the Protection of Lake Constance  |
| IMS         | Interactive Multisensor Snow and Ice Mapping System  |
| IR          | Infrared   |
| KIT         | Karlsruhe Institute of Technology  |
| LEO         | Low Earth Orbit  |
| LSA SAF     | EUMETSAT Satellite Application Facility on Land Surface Analysis                                       |
| LP DAAC     | Land Processes Distributed Active Archive Center   |
| LST         | Land Surface Temperature   |
| LUBW        | Baden-Württemberg State Institute for the Environment, Survey and Nature Conservation                  |
| MERIS       | MEdium Resolution Imaging Spectrometer   |
| MFG         | Meteosat First Generation  |
| MMDB        | Multi-sensor Match-up Database   |
| MODIS       | Moderate-resolution Imaging Spectro-radiometer   |
| MSG         | Meteosat Second Generation   |
| MW          | Microwave  |
| NASA JPL    | NASA Jet Propulsion Laboratory   |
| NOAA        | National Oceanic and Atmospheric Administration  |
| NSIDC       | National Snow & Ice Data Center  |
| NWP         | Numerical Weather Prediction   |
| RRDP        | Round Robin Data Package   |

| Term             | Definition  |
|------------------|---|
| SEVIRI           | Spinning Enhanced Visible and InfraRed Imager       |
| SFTP             | Secure File Transfer Protocol                       |
| SLSTR            | Sea and Land Surface Temperature Radiometer         |
| SSM/I            | Special Sensor Microwave Imager                     |
| SSMIS            | Special Sensor Microwave Imager/Sounder             |
| SURFRAD          | Surface Radiation Budget network                    |
| TERN             | Australian Terrestrial Ecosystem Research Network   |
| UOL              | University of Leicester                             |
| USGS             | United States Geological Survey                     |
| USGS EROS Center | USGS Earth Resources Observation and Science Center |
| WCRP             | World Climate Research Program                      |

### 3. Definition of Table Fields

This section gives definitions of the table fields used in Sections 3, 4, 5, 6, 7, and 8 of this document.

*Table 2: Example of main product description table.*

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | The name and, in the case of satellite data, the level of the data product described in the table.  |
| Data type                            | Type of platform (satellite/in situ/model/analysis) and variable for which data is provided in product.   |
| Source                               | The system or agency from which the data originates.  |
| URLs                                 | URLs of websites giving key information about the product.  |
| Version                              | Version of data that will be used within the project.   |
| Platform name and characteristics    | The name of the platform(s) from which the data originates (not used for analysis products).  |
| Platform characteristics             | Key attributes of the platform (not used for analysis products).  |
| Sensor(s) name(s)                    | The name of the instrument(s) from which the data originates (not used for analysis products).  |
| Sensor type                          | The type of sensor(s) making the observations (applicable only for observational data).   |
| Sensor key technical characteristics | Information concerning key sensor technical characteristics observations (applicable only for observational data).  |
| Analysis characteristics             | Analysis products: the observational data used in the analysis. Model: indication if product is model data.   |
| References                           | References to external journal articles, reports and web pages that provide details of technical specifications of the instrument or data product specifications. |
| Data format                          | File format of data.  |
| Data grid                            | Details of the grid where applicable.   |
| Data coverage: temporal              | Year of the first available data and year of the last available data or to present if data production is ongoing.   |
| Data coverage: spatial               | The locations for which data is available.  |

|  |  |   |
|--|--|---|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 9 |
|--|--|---|

## Product requirements

Table 3: Example of product requirements description table.

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Date that the data will be first required by the project.  |
| Use within project           | <p>The LST_CCI project can be considered to have seven strands: (1) the production of a suite of high quality infrared (IR) and microwave (MW) LST ECV Products for geostationary (GEO) and low earth orbit (LEO) satellites; (2) the production of a merged IR Climate Data Record (CDR); (3) the production of an ATSR-SLSTR CDR; (4) the production of a prototype all-sky Merged product; (5) the construction of the Multi-sensor Match-up Database (MMDB), the production of the Round Robin Data Package (RRDP) and the algorithm selection process; (6) product validation; (7) intercomparison of the ECV with other SST products.</p> <p>These strands are referred to in subsequent tables as (1) LST ECVs; (2) merged IR CDR; (3) ATSR-SLSTR CDR; (4) all-sky merged product; (5) MMDB and algorithm selection; (6) validation and (7) intercomparison. Some data sets will be used for more than one strand and subsequent entries in the table are accompanied by the relevant number in brackets.</p> |
| Reason for selection         | The properties of the product that have led to its selection for use in the project.   |
| Temporal coverage required   | The period of data required will depend on the use to which the data is put in the project (see 'Use within project' entry in this table).   |

## Data quality

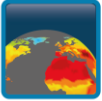

Table 4: Example of product data quality description table.

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | References to external journal articles, reports and web pages describing calibration procedures and results. |
| Data validation            | References to external journal articles, reports and web pages giving data validation procedures and results. |
| Product limitations        | Known access, calibration, validation and performance limitations.  |
| Potential product upgrades | Details of any ongoing efforts that will provide upgrades to the product prior to generation of the ECV.      |

## Data availability

Table 5: Example of main product data availability description table.

| Variable                           | Description   |
|------------------------------------|---|
| Available from                     | The distributor of the data product.  |
| Availability time scale            | The time interval between data acquisition and data availability.               |
| Estimates of data quantity (total) | An estimate of the computer storage capacity needed to store the required data. |
| Product delivery                   | A description of product ordering and delivery mechanisms.                      |
| Data reliability                   | Space and/or ground segment redundancy  |
| Pricing                            | Cost of the data.   |

|  |  |  |
|--|--|--|
|  <b>land surface<br/>temperature</b><br>cci | <b>Data Access Requirements<br/>Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 10 |
|--|--|--|

| Variable                              | Description  |
|---------------------------------------|--|
| Access conditions                     | Any conditions imposed by the data distributor and/or originator on the use of the data within this LST_CCI project. |
| Formal agreements with data suppliers | Details of any formal agreements that exist between the project and the data suppliers.                              |

## 4. Summary of Data Sets Required

The tables in this section summarise the requirements for data access. The table fields are defined in Section 3.

**Note:** All volumes assume data compression

**Note:** For explanation of asterisk, see the ‘Present required within project’ field description in Section 3.

### 4.1. Satellite data

| Product Name                    | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required   | Source | Available from | Estimates of total data quantity | Comments  |
|---------------------------------|-----------------------------|---------|------------------------------|---|--------|----------------|----------------------------------|---|
| ATSR Level 1 (ATSR-2 and AATSR) | 1991 to 2012                | 3.0     | Q1 2019                      | (1) LST ECVs (require all available data 1995-2012)<br>(2) Merged IR CDR (require all available AATSR data 2004-2012)<br>(3) ATSR-SLSTR CDR (require all available data 1995-2012)<br>(4) the production of a prototype all-sky Merged product (2008) | ESA    | CEDA Archive   | 75TB                             | ATSR 4 <sup>th</sup> re-processing is expected by end-2022. |
| AMSR-E Level 1                  | 2002 to 2011                | 4.0     | Q1 2023                      | (1) LST ECVs (require all available data 2002-2011)   | JAXA   | JAXA Archive   | 6.5TB                            |   |

## Data Access Requirements Document

*WP1.3 – DEL-1.3*

Ref.: LST-CCI-D1.3-DARD  
Version: 3.0  
Date: 15-Nov-2022  
Page: 12

| Product Name                       | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required   | Source | Available from                  | Estimates of total data quantity | Comments  |
|------------------------------------|-----------------------------|---------|------------------------------|---|--------|---------------------------------|----------------------------------|---|
| AMSR2 Level 1                      | 2012 to present             | 2.0     | Q1 2023                      | (1) LST ECVs (require all available data 2012-2021)   |        |                                 |                                  |   |
| SLSTR Level 1 (Sentinel 3A and 3B) | 2016 to present             | 1.0     | Q1 2019                      | (1) LST ECVs (require all available data 2016-2023)<br>(2) Merged IR CDR (require all available data 2016-2023)<br>(3) ATSR-SLSTR CDR (require all available data 2016-2023)<br>(4) the production of a prototype all-sky Merged product (2008) | ESA    | CEDA Archive + JASMIN Fast Tape | 2500TB                           | Only latest 2 years of data are available on disk, older data requires requests to the JASMIN Fast Tape |

| Product Name           | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required   | Source   | Available from             | Estimates of total data quantity | Comments   |
|------------------------|-----------------------------|---------|------------------------------|---|----------|----------------------------|----------------------------------|--|
| MODIS Level 1          | 1999 to present             | 6.1     | Q1 2019                      | (1) LST ECVs (require all available data from both the Terra and Aqua satellites, 1999-2023 or until satellites stop operating)<br>(2) Merged IR CDR (require all available data from both the Terra and Aqua satellites, 2004-2023 or until satellites stop operating)<br>(3) ATSR-SLSTR CDR (require all available data from the Terra satellite, 2012-2016)<br>(4) the production of a prototype all-sky Merged product (2008) | NASA     | JASMIN Fast Tape           | 700TB                            | Terra has been drifting slowly from its LECT of 10:30 and will reach and exceed 10:15 LECT by October 2022<br><br>In January 2022, Aqua began its constellation exit, by stopping all manoeuvres except collision avoidance manoeuvres, and will drift and exceed a 1:45 LECT crossing in February 2023 from its nominal LECT of 1:30<br><br>Orbital drift corrections will be calculated and implemented to the ECV products to maintain them until they exceed these 15 minutes differences from their nominal LECTs (until October 2022 for Terra and February 2023 for Aqua) |
| Metop AVHRR/3 Level 1C | 2007 to present             | 1.5     | Q4 2019                      | (1) LST ECVs (require all available data 2007-2023)<br>(2) Merged IR CDR (require all available data 2007-2023)<br>(4) the production of a prototype all-sky Merged product (2008)  | EUMETSAT | SST CCI workspace (JASMIN) | 35TB                             |  |

| Product Name                         | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required  | Source   | Available from                    | Estimates of total data quantity | Comments   |
|--------------------------------------|-----------------------------|---------|------------------------------|--|----------|-----------------------------------|----------------------------------|--|
| NOAA AVHRR/3 Level 1C ~4 km GAC data | 1998 to present             | 1.5     | Q4 2019                      | (1) LST ECVs (require all available data from NOAA satellites 15—19, 1998-2023)  | NOAA     | SST CCI workspace (JASMIN)        | 22TB                             |  |
| VIIRS Level 1B                       | 2012 to present             | 2.0.3   | Q2 2023                      | (1) LST ECVs (require all available data 2012-2023)<br>(2) Merged IR CDR (require all available data 2012-2023)<br>(4) the production of a prototype all-sky Merged product (2008)   | NASA     | LAADS DAAC                        | 130TB                            |  |
| SEVIRI Level 1                       | 2002 to present             | N/A     | Q1 2019                      | (1) LST ECVs (require all available data from MSG satellites 1-4, 2004-2023)<br>(2) Merged IR CDR (require all available data from MSG satellites 1-4, 2004-2023)<br>(4) the production of a prototype all-sky Merged product (2008) | EUMETSAT | EUMETSAT Earth Observation Portal | 50TB                             | No versions are given for TOA radiances as there is no back processing of GEO data. Calibration of SEVIRI is adjusted is there is an identified issue. |

| Product Name         | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required  | Source | Available from | Estimates of total data quantity | Comments  |
|----------------------|-----------------------------|---------|------------------------------|--|--------|----------------|----------------------------------|---|
| Imager / ABI Level 1 | 1994 to present             | N/A     | Q4 2019                      | (1) LST ECVs (require all available data from GOES satellites 12-16, 2004-2023)<br>(2) Merged IR CDR (require all available data from GOES satellites 12-16, 2009-2023)<br>(4) the production of a prototype all-sky Merged product (2008)               | NOAA   | IPMA           | 220TB                            | No versions are given for TOA radiances as there is no back processing of GEO data. |
| JAMI Level 1         | 2005 to 2015                | N/A     | Q4 2019                      | (1) LST ECVs (require all available data from the MTSAT-1 and 2 satellites, 2009-2015)<br>(2) Merged IR CDR (require all available data from the MTSAT-1 and 2 satellites, 2009-2015)<br>(4) the production of a prototype all-sky Merged product (2008) | JMA    | IPMA           | 1TB                              | No versions are given for TOA radiances as there is no back processing of GEO data. |

## 4.2. In Situ data

| Product Name     | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required                                | Source | Available from | Estimates of data quantity (total) | Comments |
|------------------|-----------------------------|---------|------------------------------|--|--------|----------------|------------------------------------|----------|
| KIT network data | 2009 to present             | 1.0     | Q2 2019                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from | KIT    | KIT            | 1GB                                |          |

| Product Name         | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required   | Source | Available from                       | Estimates of data quantity (total) | Comments   |
|----------------------|-----------------------------|---------|------------------------------|---|--------|--------------------------------------|------------------------------------|--|
|                      |                             |         |                              | selected site/s for 2009-2023.  |        |                                      |                                    |  |
| SURFRAD network data | 1994 to present             | 1.0     | Q2 2019                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023. | NOAA   | NOAA                                 | 2GB                                |  |
| ARM network data     | 2003 to present             | 1.0     | Q2 2019                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 2003-2023. | ARM    | ARM                                  | 720GB                              |  |
| AWI network data     | 1992 to present             | 1.0     | Q2 2019                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023. | AWI    | AWI                                  | 580MB                              |  |
| IGKB network data    | 1962 to present             | 1.0     | Q2 2019                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023. | LUBW   | LUBW                                 | 5MB                                |  |
| Heihe river stations | 2013/01/01 – present        | 1.0     | Q3 2021                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from                                | KIT    | University of Electronic Science and | 10 MB                              | HZZ___, DMN___sites to present, BGB___ site to present |

| Product Name     | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required  | Source     | Available from              | Estimates of data quantity (total) | Comments   |
|------------------|-----------------------------|---------|------------------------------|--|------------|-----------------------------|------------------------------------|--|
|                  |                             |         |                              | selected site/s for 2013 – 2015  |            | Technology of China (UESTC) |                                    |  |
| LAW network data | 2020 to present             | 1.0     | Q1 2023                      | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 2020 – 2023 | Copernicus | ACRI-ST                     | 50MB                               | 5 new sites focused on forest types not previously represented |

#### 4.3. Intercomparison data

| Product Name  | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required            | Source | Available from | Estimates of data quantity (total) | Comments |
|---------------|-----------------------------|---------|------------------------------|--|--------|----------------|------------------------------------|----------|
| ATS_NR__2     | 2002 to 2012                | 3.0     | Q2 2019                      | (7) intercomparison (require all available data for 2002 – 2012) | ESA    | CEDA Archive   | 8TB                                |          |
| AT2_NR__2     | 1995 to 2003                | 3.0     | Q2 2019                      | (7) intercomparison (require all available data for 1995 – 2003) | ESA    | CEDA Archive   | 5TB                                |          |
| S3A_SL_2_L ST | 2016 to present             | 1.0     | Q2 2019                      | (7) intercomparison (require all available data for 2016 – 2023) | ESA    | S3MPC          | 21TB                               |          |

| Product Name                       | Available Temporal coverage | Version | Date required within project | Use of data in project and temporal coverage required            | Source   | Available from | Estimates of data quantity (total) | Comments  |
|------------------------------------|-----------------------------|---------|------------------------------|--|----------|----------------|------------------------------------|---|
| S3B_SL_2_LST                       | 2018 to present             | 1.0     | Q2 2019                      | (7) intercomparison (require all available data for 2018 – 2023) | ESA      | S3MPC          | 14TB                               |   |
| MOD11_L2                           | 1999 to present             | 6.0     | Q2 2019                      | (7) intercomparison (require all available data for 1999 – 2022) | NASA     | LP DAAC        | 4TB                                | MODIS L2 Collection 6.1 available.  |
| MYD11_L2                           | 2002 to present             | 6.0     | Q2 2019                      | (7) intercomparison (require all available data for 2002 – 2023) | NASA     | LP DAAC        | 4TB                                |   |
| LSA SAF MLST                       | 2005 to present             | N/A     | Q2 2019                      | (7) intercomparison (require all available data for 2005 – 2023) | EUMETSAT | LSA SAF        | 1TB                                | No versions are given for LSA SAF MLST as there is no back processing of this data. |
| CM SAF TCDR (LTP and LTS products) | 1995 to present             | 1.0     | Q2 2019                      | (7) intercomparison (require all available data for 1995 – 2023) | EUMETSAT | CM SAF         | 43GB                               |   |
| ISCCP DX product                   | 1983 to 2009                | 1.0     | Q2 2019                      | (7) intercomparison (require all available data for 1995 – 2009) | WCRP     | NOAA           | 900GB                              |   |

#### 4.4. Ancillary data

| Product Name   | Available Temporal coverage | Version                            | Date required within project | Use of data in project and temporal coverage required   | Source     | Available from                  | Estimates of data quantity (total) | Comments |
|--|-----------------------------|------------------------------------|------------------------------|---|------------|---------------------------------|------------------------------------|----------|
| ERA5   | 1979 to present             | Earth System model IFS, cycle 41r2 | Q4 2018                      | (1) LST ECVs; (5) MMDDB and algorithm selection; and (7) intercomparison. Require all available data for 1995 – 2023. | ECMWF      | CEDA Archive                    | 6PB                                |          |
| ERA-Interim  | 1979 to present             | Earth System model IFS, cycle 31r2 | Q4 2018                      | (1) LST ECVs (require all available data for 1995 – 2018)   | ECMWF      | CEDA Archive                    | 114TB                              |          |
| Copernicus Global Land Service FCOVER dataset                          | 2016 to present             | 2.0                                | Q4 2018                      | (1) LST ECVs (require all available data for 2016 – 2023)   | Copernicus | Copernicus Global Land Services | 530GB                              |          |
| Copernicus Global Land Service 1 km Global NDVI dataset                | 1998 to present             | 2.2                                | Q4 2018                      | (1) LST ECVs (require all available data for 1998 – 2023)   | Copernicus | Copernicus Global Land Services | 8GB                                |          |
| UW/CIMSS Baseline Fit Global Infrared Land Surface Emissivity Database | 2003 to 2016                | 3.0                                | Q4 2018                      | (1) LST ECVs (require all available data for 2003 – 2016)   | CIMSS      | CIMSS                           | 7GB                                |          |
| MEaSURES CAMEL Broadband Emissivity Product                            | 2000 to 2016                | 2.0                                | Q4 2018                      | (1) LST ECVs (require all available data for 2000 – 2016)   | CIMSS      | CIMSS IREMIS                    | 10GB                               |          |
| ECOSTRESS (formally ASTER) spectral library                            | N/A                         | 1.0                                | Q4 2018                      | (1) LST ECVs  | NASA JPL   | NASA JPL                        | 6GB                                |          |

## 5. Satellite Data

This section contains more extensive information about the satellite data products that will be used for the ECV production and Algorithm selection. The information is displayed in the form of tables: one table for each product. Definitions of the table fields are given in Section 3.

### 5.1. ATSR Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | ATSR Level 1  |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | ESA   |
| URLs                                 | AATSR Home page <a href="http://www.leos.le.ac.uk/aatsr/">http://www.leos.le.ac.uk/aatsr/</a><br>ESA Envisat page <a href="http://envisat.esa.int/earth/www/area/index.cfm?fareaid=6">http://envisat.esa.int/earth/www/area/index.cfm?fareaid=6</a><br>ESA AATSR page <a href="https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr">https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr</a><br>RAL AATSR Ops page <a href="http://www.aatsrops.rl.ac.uk/">http://www.aatsrops.rl.ac.uk/</a><br>ATSR 1/2 Home page <a href="http://www.atsr.rl.ac.uk/">http://www.atsr.rl.ac.uk/</a><br>ESA ERS page <a href="http://earth.esa.int/ers/">http://earth.esa.int/ers/</a> |
| Version                              | 3.0   |
| Platform name and characteristics    | ERS-1, ERS-2, Envisat.  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | ATSR-1, ATSR-2, AATSR   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | Dual-view, on-board calibration, visible channels: 0.55 $\mu\text{m}$ , 0.66 $\mu\text{m}$ , 0.87 $\mu\text{m}$ , 1.6 $\mu\text{m}$ , IR channels 3.7 $\mu\text{m}$ , 11 $\mu\text{m}$ , 12 $\mu\text{m}$ .   |
| References                           | [RD-1], [RD-2], [RD-3]  |
| Data format                          | Envisat   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km  |
| Data coverage: temporal              | 1991 - 2012   |
| Data coverage: spatial               | Global  |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q1 2019   |
| Use within project           | (1) LST ECVs (require all available data 1995-2012)<br>(2) Merged IR CDR (require all available AATSR data 2004-2012)<br>(3) ATSR-SLSTR CDR (require all available data 1995-2012)<br>(4) Prototype all-sky Merged product (2008) |
| Reason for selection         | Long-term Fundamental Climate Record  |
| Temporal coverage required   | All available data for 1995-2012  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 25 |
|--|--|--|

### Data quality

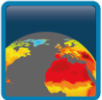

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | [RD-4], [RD-5], [RD-6]  |
| Data validation            | [RD-17]   |
| Product limitations        | Information on data quality can be found at <a href="https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr">https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr</a> |
| Potential product upgrades | ATSR 4 <sup>th</sup> re-processing is expected to be available end-2022.  |

### Data availability

| Variable                              | Description                          |
|---------------------------------------|--------------------------------------|
| Available from                        | CEDA Archive                         |
| Availability time scale               | All available.                       |
| Estimates of data quantity (total)    | 75TB                                 |
| Product delivery                      | Direct disk access from CEDA Archive |
| Data reliability                      | No redundancy                        |
| Pricing                               | Free                                 |
| Access conditions                     | User registration                    |
| Formal agreements with data suppliers | None required.                       |

## 5.2. SLSTR Level 1

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | SLSTR Level 1  |
| Data type                            | Satellite: top of the atmosphere radiances   |
| Source                               | ESA  |
| URLs                                 | <a href="https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/instrument">https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/instrument</a>  |
| Version                              | Latest Collection is 4, but this is updated every re-processing  |
| Platform name and characteristics    | Sentinel-3A, Sentinel-3B   |
| Platform characteristics             | Sun-synchronous polar orbits   |
| Sensor(s) name(s)                    | SLSTR  |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | Dual-view, on-board calibration, visible channels: 0.55 µm, 0.66 µm, 0.87 µm, 1.39 µm, 1.6 µm, IR channels 3.7 µm, 11 µm, 12 µm.   |
| References                           | Documents are available at <a href="https://sentinel.esa.int/web/sentinel/user-guides/sentinel-3-slstr/processing-levels/level-1">https://sentinel.esa.int/web/sentinel/user-guides/sentinel-3-slstr/processing-levels/level-1</a> |
| Data format                          | NetCDF-4   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km   |
| Data coverage: temporal              | 2016 to present  |
| Data coverage: spatial               | Global   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 26 |
|--|--|--|

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q1 2019  |
| Use within project           | (1) LST ECVs (require all available data 2016-2023)<br>(2) Merged IR CDR (require all available data 2016-2023)<br>(3) ATSR-SLSTR CDR (require all available data 2016-2023) |
| Reason for selection         | Input into Long-term IR CDR and single sensor ECV Product  |
| Temporal coverage required   | All available data for 2016-2023   |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | SLSTR Cyclic Reports available at <a href="https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports">https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports</a> |
| Data validation            |   |
| Product limitations        | Geolocation errors likely to increase LST uncertainty.  |
| Potential product upgrades | Hourly met data is being discussed.   |

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | CEDA Archive + JASMIN Fast Tape  |
| Availability time scale               | Within 3 days of release   |
| Estimates of data quantity (total)    | 2500TB   |
| Product delivery                      | Direct disk access from CEDA Archive or JASMIN Fast Tape for data older than 2 years |
| Data reliability                      | Two satellites in orbit and two others planned for launch.                           |
| Pricing                               | Free   |
| Access conditions                     | User registration  |
| Formal agreements with data suppliers | None required.   |

|  |  |  |

|--|--|--|

### 5.3. MODIS Level 1

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | MODIS Level 1  |
| Data type                            | Satellite: top of the atmosphere radiances   |
| Source                               | NASA   |
| URLs                                 | <a href="https://modis.gsfc.nasa.gov/">https://modis.gsfc.nasa.gov/</a>                    |
| Version                              | 6.1  |
| Platform name and characteristics    | Terra and Aqua   |
| Platform characteristics             | Sun-synchronous polar orbits   |
| Sensor(s) name(s)                    | MODIS  |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | 36 channels in the visible and IR.   |
| References                           | [RD-37]  |
| Data format                          | HDF-EOS  |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km |
| Data coverage: temporal              | 1999 to present  |
| Data coverage: spatial               | Global   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q1 2019   |
| Use within project           | (1) LST ECVs (require all available data from both the Terra and Aqua satellites, 1999-2023)<br>(2) Merged IR CDR (require all available data from both the Terra and Aqua satellites, 2004-2023)<br>(3) ATSR-SLSTR CDR (require all available data from the Terra satellite, 2012-2023)<br>(4) Prototype all-sky Merged product (2008) |
| Reason for selection         | Input into Long-term IR CDR and single sensor ECV Product   |
| Temporal coverage required   | All available data for 1999-2023  |

#### Data quality

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | [RD-37]  |
| Data validation            | [RD-17]  |
| Product limitations        | [RD-37]<br>Terra has been drifting slowly from its LECT of 10:30 and will reach and exceed 10:15 LECT by October 2022<br>In January 2022, Aqua began its constellation exit, by stopping all manoeuvres except collision avoidance manoeuvres, and will drift and exceed a 1:45 LECT crossing in February 2023 from its nominal LECT of 1:30 |
| Potential product upgrades | None identified  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 28 |
|--|--|--|

#### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | JASMIN Fast Tape  |
| Availability time scale               | Available in near real time                                     |
| Estimates of data quantity (total)    | 700TB   |
| Product delivery                      | Direct access from CEDA Archive or requested access to CEDA NLA |
| Data reliability                      | Two satellites in orbit.  |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None required.  |

### 5.4. Metop AVHRR/3 Level 1C

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | Metop AVHRR/3 Level 1C  |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | EUMETSAT  |
| URLs                                 | EUMETSAT Metop AVHRR<br><a href="https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Metop/MetopDesign/AVHRR/index.html">https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Metop/MetopDesign/AVHRR/index.html</a> |
| Version                              | 1.5   |
| Platform name and characteristics    | MetOp – A, B and C  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | AVHRR   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | AVHRR/3 has 6 channels: 0.58 - 0.68 $\mu\text{m}$ , 0.725 - 1.00 $\mu\text{m}$ , 1.58 - 1.64 $\mu\text{m}$ , 3.55 - 3.93 $\mu\text{m}$ , 10.30 - 11.30 $\mu\text{m}$ , 11.50 - 12.50 $\mu\text{m}$ .  |
| References                           | <a href="https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Metop/MetopDesign/AVHRR/index.html">https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Metop/MetopDesign/AVHRR/index.html</a>                         |
| Data format                          | NetCDF  |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 4 km x 4 km  |
| Data coverage: temporal              | 2007 to present   |
| Data coverage: spatial               | Global  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q4 2019  |
| Use within project           | (1) LST ECVs (require all available data 2007-2023)<br>(2) Merged IR CDR (require all available data 2007-2023)<br>(4) Prototype all-sky Merged product (2008) |
| Reason for selection         | Input into merged IR CDR and single sensor ECV Product   |
| Temporal coverage required   | All available data for 2007-2023   |

|  |  |  |
|--|--|--|

|--|--|--|

### Data quality

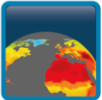

| Variable                   | Description                              |
|----------------------------|--|
| Data calibration           | [RD-7], [RD-8], [RD-9], [RD-10], [RD-11] |
| Data validation            | [RD-17]                                  |
| Product limitations        | None identified                          |
| Potential product upgrades | None identified                          |

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | CEDA Archive   |
| Availability time scale               | Currently available to present.  |
| Estimates of data quantity (total)    | 35TB   |
| Product delivery                      | Direct disk access from SST CCI workspace on JASMIN  |
| Data reliability                      | Fully redundant ground segment. In case of METOP failure, EUMETSAT is committed to launch a successor within 6 months. |
| Pricing                               | Free   |
| Access conditions                     | User registration  |
| Formal agreements with data suppliers | None required.   |

## 5.5. NOAA AVHRR/3 Level 1C

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | NOAA AVHRR/3 Level 1C  |
| Data type                            | Satellite: top of the atmosphere radiances   |
| Source                               | NOAA   |
| URLs                                 | NOAA AVHRR <a href="https://noaasis.noaa.gov/NOAASIS/ml/avhrr.html">https://noaasis.noaa.gov/NOAASIS/ml/avhrr.html</a>   |
| Version                              | 1.5  |
| Platform name and characteristics    | NOAA satellites 15—19  |
| Platform characteristics             | Sun-synchronous polar orbits   |
| Sensor(s) name(s)                    | AVHRR  |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | AVHRR/3 has 6 channels: 0.58 - 0.68 $\mu\text{m}$ , 0.725 - 1.00 $\mu\text{m}$ , 1.58 - 1.64 $\mu\text{m}$ , 3.55 - 3.93 $\mu\text{m}$ , 10.30 - 11.30 $\mu\text{m}$ , 11.50 - 12.50 $\mu\text{m}$ . |

### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2019   |
| Use within project           | (1) LST ECVs (require all available data from NOAA satellites 15—19, 1998-2023) |
| Reason for selection         | Input into single sensor ECV Product  |
| Temporal coverage required   | All available data for 1998-2023  |

### Data quality

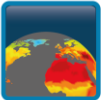

| Variable                   | Description                              |
|----------------------------|--|
| Data calibration           | [RD-7], [RD-8], [RD-9], [RD-10], [RD-11] |
| Data validation            | [RD-17]                                  |
| Product limitations        | None identified                          |
| Potential product upgrades | None identified                          |

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | SST workspace (JASMIN)  |
| Availability time scale               | Currently available to September-2020.                                |
| Estimates of data quantity (total)    | 19TB  |
| Product delivery                      | Direct access from the SST CCI workspace on JASMIN                    |
| Data reliability                      | Multiple space craft in orbit and multiple ground receiving stations. |
| Pricing                               | Free  |
| Access conditions                     | User registration and data access granted.                            |
| Formal agreements with data suppliers | None required.  |

## 5.6. VIIRS Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | VIIRS Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances                              |
| Source                               | NASA  |
| URLs                                 | <a href="https://modis.gsfc.nasa.gov/">https://modis.gsfc.nasa.gov/</a> |
| Version                              | 2.0.3   |
| Platform name and characteristics    | Suomi NPP and NOAA-20 (JPSS-1)  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | VIIRS   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 22 channels in the visible and IR.                                      |
| References                           | [RD-43]   |
| Data format                          | NetCDF  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 31 |
|--|--|--|

| Variable                | Description  |
|-------------------------|--|
| Data grid               | Rectangular grid centred on instrument ground track, approximate resolution is 750 m x 750 m |
| Data coverage: temporal | 2012 to present  |
| Data coverage: spatial  | Global   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q2 2023   |
| Use within project           | (1) LST ECVs (require all available data from both the SNPP and NOAA-20 satellites, 2012-2023)<br>(2) Merged IR CDR (require all available data from both the SNPP and NOAA-20 satellites, 2012-2023) |
| Reason for selection         | Input into single sensor ECV Product  |
| Temporal coverage required   | All available data for 2012-2023  |

#### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data calibration           | [RD-44]         |
| Data validation            | [RD-44]         |
| Product limitations        | None identified |
| Potential product upgrades | None identified |

#### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | NASA LAADS DAAC  |
| Availability time scale               | Available in near real time  |
| Estimates of data quantity (total)    | 130TB  |
| Product delivery                      | FTP download   |
| Data reliability                      | Two satellites in orbit.<br>Suomi NPP crosses the equator about 1:30 a.m. and 1:30 p.m. and NOAA-20 crosses at 2:20 am and 2:20 pm, local time |
| Pricing                               | Free   |
| Access conditions                     | User registration  |
| Formal agreements with data suppliers | None required.   |

### 5.7. SEVIRI Level 1

| Variable     | Description                                |
|--------------|--|
| Product Name | SEVIRI Level 1                             |
| Data type    | Satellite: top of the atmosphere radiances |

|  |  |  |
|--|--|--|

|--|--|--|

| Variable                             | Description  |
|--------------------------------------|--|
| Source                               | EUMETSAT   |
| URLs                                 | EUMETSAT Meteosat<br><a href="https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Meteosat/MeteosatDesign/index.html">https://www.eumetsat.int/website/home/Satellites/CurrentSatellites/Meteosat/MeteosatDesign/index.html</a> |
| Version                              | N/A  |
| Platform name and characteristics    | MSG satellites 1-4   |
| Platform characteristics             | Geostationary orbit  |
| Sensor(s) name(s)                    | SEVIRI   |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | 12 spectral channels, 1 km resolution in high resolution visible channel, 3 km in other visible channels   |
| References                           | [RD-12]  |
| Data format                          | HRIT   |
| Data grid                            | Geo grid   |
| Data coverage: temporal              | 2002 to present  |
| Data coverage: spatial               | 79° W to 79° E longitude, 81° S to 81° N latitude  |

#### Product requirements

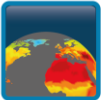

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q1 2019  |
| Use within project           | (1) LST ECVs (require all available data from MSG satellites 1-4, 2004-2023)<br>(2) Merged IR CDR (require all available data from MSG satellites 1-4, 2004-2023)<br>(4) Prototype all-sky Merged product (2008) |
| Reason for selection         | Input into merged IR CDR and single sensor ECV Product   |
| Temporal coverage required   | All available data for 2004-2023   |

#### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | <a href="https://www.eumetsat.int/website/home/Data/Products/Calibration/MSGCalibration/index.html">https://www.eumetsat.int/website/home/Data/Products/Calibration/MSGCalibration/index.html</a>     |
| Data validation            | <a href="https://www.eumetsat.int/website/home/Data/Products/Calibration/Intercalibration/index.html">https://www.eumetsat.int/website/home/Data/Products/Calibration/Intercalibration/index.html</a> |
| Product limitations        | None identified   |
| Potential product upgrades | None  |

#### Data availability

| Variable                           | Description                       |
|------------------------------------|-----------------------------------|
| Available from                     | EUMETSAT Earth Observation Portal |
| Availability time scale            | Within 1 hour                     |
| Estimates of data quantity (total) | 50TB                              |
| Product delivery                   | Automated access from EUMETCAST   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 33 |
|--|--|--|

|                                       |  |
|---------------------------------------|--|
| Data reliability                      | Fully redundant ground segment. Two operable satellites maintained in orbit at any one time. |
| Pricing                               | Free   |
| Access conditions                     | See EUMETSAT data policy   |
| Formal agreements with data suppliers | None required.   |

## 5.8. Imager / ABI Level 1

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | Imager / ABI Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances   |
| Source                               | NOAA   |
| URLs                                 | <a href="https://www.goes.noaa.gov/">https://www.goes.noaa.gov/</a>                              |
| Version                              | N/A  |
| Platform name and characteristics    | GOES satellites 12-16  |
| Platform characteristics             | Geostationary orbit  |
| Sensor(s) name(s)                    | Imager   |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | 7 visible and IR spectral channels: 0.65 µm, 3.90 µm, 6.55 µm, 10.70 µm - 11.2 µm, 13.35 µm 10.2 |
| References                           |  |
| Data format                          | GVAR   |
| Data grid                            | Geo grid   |
| Data coverage: temporal              | 1994 to present  |
| Data coverage: spatial               | 156° W to 6° E longitude, 78° S to 78° N latitude  |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q4 2019  |
| Use within project           | (1) LST ECVs (require all available data from GOES satellites 12-16, 2004-2023)<br>(2) Merged IR CDR (require all available data from GOES satellites 12-16, 2004-2023)<br>(4) Prototype all-sky Merged product (2008) |
| Reason for selection         | Input into merged IR CDR and single sensor ECV Product   |
| Temporal coverage required   | All available data for 2004-2023   |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | <a href="https://www.ospo.noaa.gov/Operations/GOES/calibration/">https://www.ospo.noaa.gov/Operations/GOES/calibration/</a> |
| Data validation            | [RD-17]   |
| Product limitations        | None identified   |
| Potential product upgrades | None  |

|--|--|--|

#### Data availability

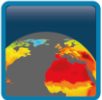

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | IPMA   |
| Availability time scale               | Within 3 hours.  |
| Estimates of data quantity (total)    | 220TB  |
| Product delivery                      | On request from IPMA   |
| Data reliability                      | Fully redundant ground segment. Two operable satellites maintained in orbit at any one time. |
| Pricing                               | Free   |
| Access conditions                     | See NOAA data policy   |
| Formal agreements with data suppliers | None required.   |

### 5.9. JAMI Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | JAMI Level 1  |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | JMA   |
| URLs                                 |   |
| Version                              | N/A   |
| Platform name and characteristics    | MTSAT-1 and 2   |
| Platform characteristics             | Geostationary orbit   |
| Sensor(s) name(s)                    | JAMI  |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 5 channels at 4.0 km resolution for IR channels and 1.0 km resolution for the visible channels: 0.725 $\mu\text{m}$ , 3.75 $\mu\text{m}$ , 6.75 $\mu\text{m}$ , 10.8 $\mu\text{m}$ , 12.0 $\mu\text{m}$ |
| References                           |   |
| Data format                          | LRIT  |
| Data grid                            | Geo grid  |
| Data coverage: temporal              | 2005 to 2015  |
| Data coverage: spatial               | 64° E to 134° W longitude, 81° S to 81° N latitude  |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2019   |
| Use within project           | (1) LST ECVs (require all available data from the MTSAT-2 and 3 satellites, 2009-2015)<br>(2) Merged IR CDR (require all available data from the MTSAT-2 and 3 satellites, 2009-2015) |
| Reason for selection         | Input into merged IR CDR and single sensor ECV Product  |
| Temporal coverage required   | All available data for 2009-2015  |

## 5.10. AHI Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | AHI Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | JMA   |
| URLs                                 | <a href="http://www.jma.go.jp/jma/indexe.html">http://www.jma.go.jp/jma/indexe.html</a> |
| Version                              | N/A   |
| Platform name and characteristics    | Himawari-8  |
| Platform characteristics             | Geostationary orbit   |
| Sensor(s) name(s)                    | AHI   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 16 channels in IR and visible at 2.0 km resolution                                      |
| References                           | [RD-45]   |
| Data format                          | LRIT  |
| Data grid                            | Geo grid  |
| Data coverage: temporal              | 2015 to present   |
| Data coverage: spatial               | 80° E to 160° W longitude, 60° S to 60° N latitude                                      |

### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q3 2022   |
| Use within project           | (1) LST ECVs (require all available data from the Himawari-8 satellite, 2015-2023)<br>(2) Merged IR CDR (require all available data from the Himawari-8 satellite, 2015-2023) |
| Reason for selection         | Input into merged IR CDR and single sensor ECV Product  |
| Temporal coverage required   | All available data for 2015-2023  |

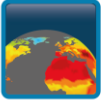

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | <a href="https://www.data.jma.go.jp/mscweb/en/support/support.html">https://www.data.jma.go.jp/mscweb/en/support/support.html</a> |
| Data validation            | [RD-45]   |
| Product limitations        | None identified   |
| Potential product upgrades | None  |

### Data availability

| Variable                           | Description                             |
|------------------------------------|---|
| Available from                     | IPMA                                    |
| Availability time scale            | Within 3 hours.                         |
| Estimates of data quantity (total) | 30TB                                    |
| Product delivery                   | On request from IPMA                    |
| Data reliability                   | Redundant ground segment not available. |

## 5.11. SSM/I Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | SSM/I Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | NOAA  |
| URLs                                 | <a href="https://doi.org/10.5676/EUM_SAF_CM/FCDR_MWI/V003">https://doi.org/10.5676/EUM_SAF_CM/FCDR_MWI/V003</a>   |
| Version                              | 3.0   |
| Platform name and characteristics    | DMSP satellites F11 and F13   |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | SSM/I   |
| Sensor type                          | MW radiometer   |
| Sensor key technical characteristics | 4 frequencies and 7-channels: 19.35GHz, 22.235GHz, 37.0GHz, 85.5 GHz, all frequencies with vertical and horizontal polarization, apart from the 22.235 GHz. |
| References                           | [RD-25]   |
| Data format                          | NetCDF  |
| Data grid                            | Twice per day (~ 6 am/pm), at instrument swath position (spacing depending on frequency, finest spacing ~15 km at 85.5 GHz).                                |
| Data coverage: temporal              | 1987 to 2008  |
| Data coverage: spatial               | Global  |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q1 2019  |
| Use within project           | (1) LST ECVs (require all available data from the DMSP satellites F11 and F13 1998-2008) |
| Reason for selection         | Input into single sensor ECV Product   |
| Temporal coverage required   | All available data for 1998-2008   |

### Data quality

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | The data processing accounts for several known issues with the instruments and corrects calibration anomalies due to along-scan inhomogeneity, moonlight intrusions, sunlight intrusions, and emissive reflector. Furthermore, an inter-calibration model incorporates a scene dependent inter-satellite bias correction and a non-linearity correction to the instrument calibration. |
| Data validation            |  |
| Product limitations        | None identified so far   |
| Potential product upgrades | None   |

|  |  |  |
|--|--|--|

|--|--|--|

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | CM SAF   |
| Availability time scale               | All available.   |
| Estimates of data quantity (total)    | 500GB  |
| Product delivery                      | Ftp download from CM-SAF archive.  |
| Data reliability                      | Two operable satellites carrying SSM/I or SSMIS sensors have been maintained in orbit at any one time for the past 20 years. |
| Pricing                               | Free   |
| Access conditions                     | See CM SAF data policy   |
| Formal agreements with data suppliers | None required.   |

## 5.12. SSMIS Level 1

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | SSMIS Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances  |
| Source                               | NOAA  |

|--|--|--|

### Data quality

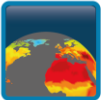

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | The data processing accounts for several known issues with the instruments and corrects calibration anomalies due to along-scan inhomogeneity, moonlight intrusions, sunlight intrusions, and emissive reflector. Furthermore, an inter-calibration model incorporates a scene dependent inter-satellite bias correction and a non-linearity correction to the instrument calibration. |
| Data validation            | None identified  |
| Product limitations        | None identified  |
| Potential product upgrades | None   |

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | CM SAF   |
| Availability time scale               | Inter-calibrated L1 data already available up to 2015, following years subject to CM-SAF processing scheduling.              |
| Estimates of data quantity (total)    | 2TB  |
| Product delivery                      | Ftp download from CM-SAF archive.  |
| Data reliability                      | Two operable satellites carrying SSM/I or SSMIS sensors have been maintained in orbit at any one time for the past 20 years. |
| Pricing                               | Free   |
| Access conditions                     | See CM SAF data policy   |
| Formal agreements with data suppliers | None required.   |

## 5.13. AMSR-E Level-1

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | AMSR-E Level 1   |
| Data type                            | Satellite: top of the atmosphere radiances   |
| Source                               | JAXA   |
| URLs                                 | <a href="https://earth.jaxa.jp/en/data/">https://earth.jaxa.jp/en/data/</a>  |
| Version                              | 4.0  |
| Platform name and characteristics    | AQUA   |
| Platform characteristics             | Sun-synchronous polar orbit  |
| Sensor(s) name(s)                    | AMSR-E   |
| Sensor type                          | MW radiometer  |
| Sensor key technical characteristics | 6 frequencies: 6.925, 10.65, 18.7, 23.8, 36.5, and 89.0 GHz, all frequencies with vertical and horizontal polarization |
| References                           | [RD-46]  |
| Data format                          | HDF  |

|  |  |  |
|--|--|--|

## 6. In Situ Data

This section contains more extensive information about the in situ data products that will be used in the LST\_CCI project. The information is displayed in the form of tables: one table for each product. Definitions of the table fields are given in Section 3.

### 6.1. KIT network data

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | KIT network data  |
| Data type                            | In situ radiometric observations  |
| Source                               | KIT   |
| URLs                                 | KIT Surface Temperature validation <a href="https://www.imk-asf.kit.edu/english/MSA-Validation.php">https://www.imk-asf.kit.edu/english/MSA-Validation.php</a>  |
| Version                              | 1.0   |
| Platform name and characteristics    | Evora, Portugal; Dahra tree mast, Senegal; Gobabeb wind tower, Namibia; Rust mijn Ziel (RMZ) Farm, Kalahari, Namibia; Farm Heimat, Kalahari, Namibia  |
| Platform characteristics             | Validation station  |
| Sensor(s) name(s)                    | Heitronics KT15.85 IIP  |
| Sensor type                          | infrared radiometers  |
| Sensor key technical characteristics | KT15.85 IIP sensors measure IR radiance between 9.6 and 11.5 $\mu\text{m}$ and provide brightness temperatures with a resolution of 0.03 K, an accuracy of $\pm 0.3$ K, and with a drift of less than 0.01 % per month. They are self-calibrating, chopped precision radiometers.               |
| References                           | <a href="https://www.heitronics.com/en/infrarot-messtechnik/produkte/radiation-thermometers/universelle-spezialisten/kt15-ii-serie/kt15ii-series/">https://www.heitronics.com/en/infrarot-messtechnik/produkte/radiation-thermometers/universelle-spezialisten/kt15-ii-serie/kt15ii-series/</a> |
| Data format                          | ASCII   |
| Data grid                            | None  |
| Data coverage: temporal              | 2009 to present   |
| Data coverage: spatial               | 5 in situ sites in Portugal, Senegal and Namibia  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 2009-2023.                      |
| Reason for selection         | KT15.85 radiometers are long-term stable with minimum drift. KIT network radiometers are regularly checked, recalibrated and maintained. |
| Temporal coverage required   | All available data for 2009-2023   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 46 |
|--|--|--|

### Data quality

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | All radiometers are initially calibrated to specifications by the manufacturer (Heitronics GmbH, Wiesbaden, Germany). Once deployed the radiometers are checked annually in parallel runs with freshly calibrated reference instruments. Recalibration against a blackbody is performed by KIT about every two years and after an exchange of instruments [RD-13]. |
| Data validation            | Not Applicable   |
| Product limitations        | None identified  |
| Potential product upgrades | None   |

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | KIT   |
| Availability time scale               | Within 1 month.   |
| Estimates of data quantity (total)    | 1GB   |
| Product delivery                      | Will be made available by KIT.  |
| Data reliability                      | Fully redundant ground station.   |
| Pricing                               | Free  |
| Access conditions                     | One year of in situ data is made available to all project partners, the other years are only accessible to the validation team. |
| Formal agreements with data suppliers | None required.  |

## 6.2. SURFRAD network data

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | SURFRAD network data  |
| Data type                            | In situ radiometric observations  |
| Source                               | NOAA  |
| URLs                                 | NOAA SURFRAD Network <a href="https://www.esrl.noaa.gov/gmd/grad/surfrad/">https://www.esrl.noaa.gov/gmd/grad/surfrad/</a>  |
| Version                              | 1.0   |
| Platform name and characteristics    | Bondville, Illinois; Table Mountain, Boulder, Colorado; Desert Rock, Nevada; Fort Peck, Montana; Goodwin Creek, Mississippi; Penn. State Univ., Pennsylvania; Sioux Falls, South Dakota |
| Platform characteristics             | Validation station  |
| Sensor(s) name(s)                    | Eppley Precision Infrared Radiometers   |
| Sensor type                          | infrared radiometers  |
| Sensor key technical characteristics | Eppley Precision Infrared Radiometers have a hemispheric field of view measuring radiances in a wavelength range of 4 - 50 $\mu\text{m}$ .  |
| References                           | <a href="http://www.eppleylab.com/instrument-list/precision-infrared-radiometer/">http://www.eppleylab.com/instrument-list/precision-infrared-radiometer/</a>                           |
| Data format                          | SURFRAD   |
| Data grid                            | None  |
| Data coverage: temporal              | 1994 to present   |
| Data coverage: spatial               | 7 in situ sites in the USA  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 47 |
|--|--|--|

### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q2 2019   |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023. |
| Reason for selection         | Relatively long-term, actively maintained in situ data set  |
| Temporal coverage required   | All available data for 1995-2023  |

### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data calibration           | [RD-14]         |
| Data validation            | Not applicable  |
| Product limitations        | None identified |
| Potential product upgrades | None            |

### Data availability

| Variable                              | Description                     |
|---------------------------------------|---------------------------------|
| Available from                        | SURFRAD                         |
| Availability time scale               | Within 1 month.                 |
| Estimates of data quantity (total)    | 2GB                             |
| Product delivery                      | ftp from BSRN                   |
| Data reliability                      | Fully redundant ground station. |
| Pricing                               | Free                            |
| Access conditions                     | Freely available.               |
| Formal agreements with data suppliers | None required.                  |

## 6.3. ARM network data

| Variable                          | Description   |
|-----------------------------------|---|
| Product Name                      | ARM network data  |
| Data type                         | In situ radiometric observations  |
| Source                            | ARM   |
| URLs                              | ARM network <a href="https://www.arm.gov/">https://www.arm.gov/</a>   |
| Version                           | 1.0   |
| Platform name and characteristics | Southern Great Plains Facility, Oklahoma; Barrow, North Slope of Alaska                                     |
| Platform characteristics          | Validation station  |
| Sensor(s) name(s)                 | Eppeley Precision Infrared Radiometers at Barrow and KT19.85 Infrared Thermometers at Southern Great Plains |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 48 |
|--|--|--|

| Variable                             | Description   |
|--------------------------------------|---|
| Sensor type                          | infrared radiometers or thermometers  |
| Sensor key technical characteristics | Eppey Precision Infrared Radiometers have a hemispheric field of view measuring radiances in a wavelength range of 4 - 50 $\mu\text{m}$ . The upwelling pyrgeometer is ventilated and shaded at these sites. KT15.85 IIP sensors measure IR radiance between 9.6 and 11.5 $\mu\text{m}$ . |
| References                           | <a href="http://www.eppey.com/instrument-list/precision-infrared-radiometer/">http://www.eppey.com/instrument-list/precision-infrared-radiometer/</a> [RD-15]   |
| Data format                          | NetCDF  |
| Data grid                            | None  |
| Data coverage: temporal              | 2003 to present   |
| Data coverage: spatial               | Various sites globally  |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 2003-2023 |
| Reason for selection         | Relatively long-term, actively maintained in situ data set   |
| Temporal coverage required   | All available data for 2003-2023   |

### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data calibration           | [RD-34]         |
| Data validation            | Not applicable  |
| Product limitations        | None identified |
| Potential product upgrades | None            |

### Data availability

| Variable                              | Description                     |
|---------------------------------------|---------------------------------|
| Available from                        | ARM                             |
| Availability time scale               | Within 1 month.                 |
| Estimates of data quantity (total)    | 720GB                           |
| Product delivery                      | Direct download from ARM.       |
| Data reliability                      | Fully redundant ground station. |
| Pricing                               | Free                            |
| Access conditions                     | Freely available.               |
| Formal agreements with data suppliers | None required.                  |

|  |  |  |

## 6.4. AWI network data

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | AWI network data  |
| Data type                            | In situ radiometric observations  |
| Source                               | AWI   |
| URLs                                 | AWI network <a href="https://www.awi.de/en/science/long-term-observations/atmosphere/antarctic-neumayer/meteorology/radiation.html">https://www.awi.de/en/science/long-term-observations/atmosphere/antarctic-neumayer/meteorology/radiation.html</a> |
| Version                              | 1.0   |
| Platform name and characteristics    | Georg-von Neumayer, Antarctica  |
| Platform characteristics             | Validation station  |
| Sensor(s) name(s)                    | Eppley Precision Infrared Radiometers   |
| Sensor type                          | infrared radiometers  |
| Sensor key technical characteristics | Eppley Precision Infrared Radiometers have a hemispheric field of view measuring radiances in a wavelength range of 4 - 50 $\mu\text{m}$ .  |
| References                           | <a href="http://www.eppleylab.com/instrument-list/precision-infrared-radiometer/">http://www.eppleylab.com/instrument-list/precision-infrared-radiometer/</a>   |
| Data format                          | NetCDF  |
| Data grid                            | None  |
| Data coverage: temporal              | 1992 to present   |
| Data coverage: spatial               | One site in Antarctica  |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023 |
| Reason for selection         | Relatively long-term, actively maintained in situ data set   |
| Temporal coverage required   | All available data for 1995-2023   |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | The instruments are serviced throughout the year and are re-calibrated once per year [RD-16]. |
| Data validation            | Not applicable.   |
| Product limitations        | None identified   |
| Potential product upgrades | None  |

|  |  |  |

#### Data availability

| Variable                              | Description                     |
|---------------------------------------|---------------------------------|
| Available from                        | AWI                             |
| Availability time scale               | Within 1 month.                 |
| Estimates of data quantity (total)    | 580MB                           |
| Product delivery                      | Available online                |
| Data reliability                      | Fully redundant ground station. |
| Pricing                               | Free                            |
| Access conditions                     | Freely available upon request.  |
| Formal agreements with data suppliers | None required.                  |

## 6.5. IGKB network data

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | IGKB network data   |
| Data type                            | In situ radiometric observations  |
| Source                               | LUBW  |
| URLs                                 | <a href="https://www.lubw.baden-wuerttemberg.de/wasser/institut-fuer-seenforschung">https://www.lubw.baden-wuerttemberg.de/wasser/institut-fuer-seenforschung</a>                                   |
| Version                              | 1.0   |
| Platform name and characteristics    | Fischbach-Uttwil/Lange-nargen-Arbon, Lake Constance, Germany  |
| Platform characteristics             | Validation station  |
| Sensor(s) name(s)                    | Multi-channel temperature loggers (RBR)   |
| Sensor type                          | Thermistor  |
| Sensor key technical characteristics | The temperature logger operates with thermistor strings in a temperature range from -5° C to 35° C.   |
| References                           | <a href="http://rbr-global.com/wp-content/uploads/2018/01/0005559revB-RBRconcerto3-Tx-datasheet.pdf">http://rbr-global.com/wp-content/uploads/2018/01/0005559revB-RBRconcerto3-Tx-datasheet.pdf</a> |
| Data format                          | NetCDF  |
| Data grid                            | None  |
| Data coverage: temporal              | 1962 to present   |
| Data coverage: spatial               | Two stations location on Lake Constance.  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 1995-2023 |
| Reason for selection         | Relatively long-term, actively maintained in situ data set   |
| Temporal coverage required   | All available data for 1995-2023   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 51 |
|--|--|--|

### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data calibration           | None identified |
| Data validation            | Not applicable. |
| Product limitations        | None identified |
| Potential product upgrades | None            |

### Data availability

| Variable                              | Description                       |
|---------------------------------------|-----------------------------------|
| Available from                        | LUBW                              |
| Availability time scale               | Within 3 months.                  |
| Estimates of data quantity (total)    | 5MB                               |
| Product delivery                      | Available directly from LUBW.     |
| Data reliability                      | Fully redundant lake station.     |
| Pricing                               | Free                              |
| Access conditions                     | Only for CCI+ Validation purposes |
| Formal agreements with data suppliers | Data use agreement.               |

## 6.6. Heihe river stations

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | HZZ___, DMN___, BGB___   |
| Data type                            | In situ radiometric observations   |
| Source                               | University of Electronic Science and Technology of China (UESTC) / KIT   |
| URLs                                 | <a href="#">Not applicable</a>   |
| Version                              | 1.0  |
| Platform name and characteristics    | Heihe River station (Huazhaizi Desert Steppe - HZZ___, Daman – DMN___, Bajitan Gobi – BGB___)                        |
| Platform characteristics             | Validation station   |
| Sensor(s) name(s)                    | CNR 1 ( HZZ___, BGB___), PIR (DMN___)  |
| Sensor type                          | CNR 1: Net Radiometer (pyranometer and pyrgeometer pair), PIR: pyrgeometer   |
| Sensor key technical characteristics | Broadband infrared measurements in a wavelength range between 4-50 microns (PIR) and between 5 to 50 microns (CNR 1) |
| References                           | [RD-41], [RD-42]   |
| Data format                          | netCDF   |
| Data grid                            | Point measurements (station data)  |
| Data coverage: temporal              | 10 min   |
| Data coverage: spatial               | Local  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 52 |
|--|--|--|

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q3 2021  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s |
| Reason for selection         | Three years of infrared measurements in the southern hemisphere, where in situ stations are sparse   |
| Temporal coverage required   | 10 min   |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | Calibration against a Fluke 4180 precision infrared calibrator 297 (Fluke Corp., USA) (Zhou et al., 2016) |
| Data validation            | None identified   |
| Product limitations        | Mesurements stopped for BGB in 2015;  |
| Potential product upgrades | None  |

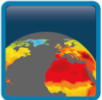

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | March 2019 / University of Electronic Science and Technology of China (UESTC) |
| Availability time scale               | 3 years of data   |
| Estimates of data quantity (total)    | 10 MB   |
| Product delivery                      | Via email   |
| Data reliability                      | Not known   |
| Pricing                               | Free  |
| Access conditions                     | Include references from data set producers                                    |
| Formal agreements with data suppliers | Via mail (Mingsong Li, UESTC)   |

## 6.7. LAW network data

| Variable                          | Description   |
|-----------------------------------|---|
| Product Name                      | LAW network data  |
| Data type                         | In situ radiometric observations  |
| Source                            | Copernicus  |
| URLs                              | <a href="https://law.acri-st.fr/home">https://law.acri-st.fr/home</a>                                   |
| Version                           | 1.0   |
| Platform name and characteristics | KIT Forest, Germany; Svartberget, Sweden; Hyytiala, Finland; Puechabon, France; Robson Creek, Australia |
| Platform characteristics          | Validation station  |
| Sensor(s) name(s)                 | Heitronics KT15.85 IIP  |
| Sensor type                       | infrared radiometers  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 53 |
|--|--|--|

|                                      |   |
|--------------------------------------|---|
| Sensor key technical characteristics | KT15.85 IIP sensors measure IR radiance between 9.6 and 11.5 $\mu\text{m}$ and provide brightness temperatures with a resolution of 0.03 K, an accuracy of $\pm 0.3$ K, and with a drift of less than 0.01 % per month. They are self-calibrating, chopped precision radiometers.               |
| References                           | <a href="https://www.heitronics.com/en/infrarot-messtechnik/produkte/radiation-thermometers/universelle-spezialisten/kt15-ii-serie/kt15ii-series/">https://www.heitronics.com/en/infrarot-messtechnik/produkte/radiation-thermometers/universelle-spezialisten/kt15-ii-serie/kt15ii-series/</a> |
| Data format                          | NetCDF  |
| Data grid                            | None  |
| Data coverage: temporal              | 2020 to present   |
| Data coverage: spatial               | 5 in situ sites in Europe (4) and Australia (1)   |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q1 2023  |
| Use within project           | (5) MMDB and algorithm selection and (6) validation. Require all available data from selected site/s for 2020-2023 |
| Reason for selection         | Actively maintained in situ data set in an area not observed through other radiometer networks                     |
| Temporal coverage required   | All available data for 2020-2023   |

### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data calibration           | None identified. |
| Data validation            | Not applicable.  |
| Product limitations        | None identified  |
| Potential product upgrades | None             |

### Data availability

| Variable                              | Description                     |
|---------------------------------------|---------------------------------|
| Available from                        | ACRI-ST                         |
| Availability time scale               | All available.                  |
| Estimates of data quantity (total)    | 50MB                            |
| Product delivery                      | Available online.               |
| Data reliability                      | Fully redundant ground station. |
| Pricing                               | Free                            |
| Access conditions                     | Freely available.               |
| Formal agreements with data suppliers | None required.                  |

## 7. Intercomparison Data

This section contains more extensive information about the intercomparison data products that will be used in the LST\_CCI project. The information is displayed in the form of tables: one table for each product. Definitions of the table fields are given in Section 3.

### 7.1. ATS\_NR\_\_2

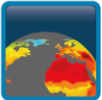

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | ATS_NR__2   |
| Data type                            | Satellite: retrieved LST  |
| Source                               | ESA   |
| URLs                                 | <a href="http://catalogue.ceda.ac.uk/uuid/ebb0efd3bf06d7d0472503729201e624">http://catalogue.ceda.ac.uk/uuid/ebb0efd3bf06d7d0472503729201e624</a>   |
| Version                              | 2.1   |
| Platform name and characteristics    | Envisat.  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | AATSR   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | Dual-view, on-board calibration, visible channels: 0.55 $\mu\text{m}$ , 0.66 $\mu\text{m}$ , 0.87 $\mu\text{m}$ , 1.6 $\mu\text{m}$ , IR channels 3.7 $\mu\text{m}$ , 11 $\mu\text{m}$ , 12 $\mu\text{m}$ . |
| References                           | [RD-1], [RD-2], [RD-3]  |
| Data format                          | Envisat   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km  |
| Data coverage: temporal              | 2002 - 2012   |
| Data coverage: spatial               | Global  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 2002 – 2012) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 2002-2012                                 |

#### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | [RD-4], [RD-5], [RD-6]  |
| Data validation            | [RD-35]   |
| Product limitations        | Information on data quality can be found at <a href="https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr">https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr</a> |
| Potential product upgrades | None Identified   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 55 |
|--|--|--|

## Data availability

| Variable                              | Description                          |
|---------------------------------------|--------------------------------------|
| Available from                        | CEDA Archive                         |
| Availability time scale               | All available.                       |
| Estimates of data quantity (total)    | 8TB                                  |
| Product delivery                      | Direct disk access from CEDA Archive |
| Data reliability                      | No redundancy                        |
| Pricing                               | Free                                 |
| Access conditions                     | User registration                    |
| Formal agreements with data suppliers | None                                 |

## 7.2. AT2\_NR\_\_2

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | AT2_NR__2   |
| Data type                            | Satellite: retrieved LST  |
| Source                               | ESA   |
| URLs                                 | <a href="http://catalogue.ceda.ac.uk/uuid/36473df8dd5b82309c06539a57210698">http://catalogue.ceda.ac.uk/uuid/36473df8dd5b82309c06539a57210698</a>   |
| Version                              | 2.1   |
| Platform name and characteristics    | ERS-2   |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | ATSR-2  |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | Dual-view, on-board calibration, visible channels: 0.55 $\mu\text{m}$ , 0.66 $\mu\text{m}$ , 0.87 $\mu\text{m}$ , 1.6 $\mu\text{m}$ , IR channels 3.7 $\mu\text{m}$ , 11 $\mu\text{m}$ , 12 $\mu\text{m}$ . |
| References                           | [RD-1], [RD-2], [RD-3]  |
| Data format                          | Envisat   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km  |
| Data coverage: temporal              | 1995 - 2003   |
| Data coverage: spatial               | Global  |

## Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 1995 – 2003) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 1995-2003                                 |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 56 |
|--|--|--|

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | [RD-4], [RD-5], [RD-6]  |
| Data validation            | [RD-35]   |
| Product limitations        | Information on data quality can be found at <a href="https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr">https://earth.esa.int/web/guest/missions/esa-operational-eo-missions/envisat/instruments/aatsr</a> |
| Potential product upgrades | None Identified   |

### Data availability

| Variable                              | Description                          |
|---------------------------------------|--------------------------------------|
| Available from                        | CEDA Archive                         |
| Availability time scale               | All available.                       |
| Estimates of data quantity (total)    | 5TB                                  |
| Product delivery                      | Direct disk access from CEDA Archive |
| Data reliability                      | No redundancy                        |
| Pricing                               | Free                                 |
| Access conditions                     | User registration                    |
| Formal agreements with data suppliers | None                                 |

## 7.3. S3A\_SL\_2\_LST and S3B\_SL\_2\_LST

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | S3A_SL_2_LST and S3B_SL_2_LST   |
| Data type                            | Satellite: retrieved LST  |
| Source                               | ESA   |
| URLs                                 | <a href="https://sentinel.esa.int/web/sentinel/missions/sentinel-3">https://sentinel.esa.int/web/sentinel/missions/sentinel-3</a>   |
| Version                              | Latest Processing Baseline (currently PB2.37 S3A and PB1.12 S3B)  |
| Platform name and characteristics    | Sentinel-3A and 3B  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | SLSTR   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | Dual-view, on-board calibration, visible channels: 0.55 µm, 0.66 µm, 0.87 µm, 1.39 µm, 1.6 µm, IR channels 3.7 µm, 11 µm, 12 µm.  |
| References                           | SLSTR Cyclic Reports available at <a href="https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports">https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports</a> |
| Data format                          | NetCDF-4  |
| Data grid                            | Uniform grid of points in the common quasi-Cartesian coordinate system, approximate resolution is 1 km x 1 km   |
| Data coverage: temporal              | 2016 - present  |
| Data coverage: spatial               | Global  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 57 |
|--|--|--|

### Product requirements

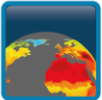

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 2016 – 2023) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 2016-2023                                 |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | SLSTR Cyclic Reports available at <a href="https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports">https://sentinel.esa.int/web/sentinel/technical-guides/sentinel-3-slstr/data-quality-reports</a> |
| Data validation            |   |
| Product limitations        | Geolocation errors likely to increase LST uncertainty.  |
| Potential product upgrades | Hourly met data is being discussed.   |

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | S3MPC  |
| Availability time scale               | Non-time critical data within 4 days   |
| Estimates of data quantity (total)    | 22 Tb (S3A) and 14 Tb (S3B)  |
| Product delivery                      | Direct disk access from Collaborative Platform (CTCP) with FTP available to transfer to JASMIN       |
| Data reliability                      | SLSTR PAC (Processing and Archive Centre) is based at ACRI-ST for land products with full redundancy |
| Pricing                               | Free   |
| Access conditions                     | User registration  |
| Formal agreements with data suppliers | None   |

## 7.4. MOD11\_L2

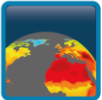

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | MOD11_L2  |
| Data type                            | Satellite: retrieved LST  |
| Source                               | NASA  |
| URLs                                 | <a href="https://modis.gsfc.nasa.gov/data/dataproduct/mod11.php">https://modis.gsfc.nasa.gov/data/dataproduct/mod11.php</a> |
| Version                              | 6.1   |
| Platform name and characteristics    | Terra   |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | MODIS   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 36 channels in the visible and IR.  |
| References                           | [RD-38], [RD-39]  |
| Data format                          | HDF-EOS   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km                                  |
| Data coverage: temporal              | 1999 - present  |
| Data coverage: spatial               | Global  |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 1999 – 2022) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 1999-2022                                 |

### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data calibration           | [RD-38], [RD-39]  |
| Data validation            | [RD-39]   |
| Product limitations        | [RD-39]<br>Terra has been drifting slowly from its LECT of 10:30 and will reach and exceed 10:15 LECT by October 2022 |
| Potential product upgrades | MODIS L2 Collection 6.1 is expected during the lifetime of the project.   |

|  |  |  |

|--|--|--|

#### Data availability

| Variable                              | Description                 |
|---------------------------------------|-----------------------------|
| Available from                        | LP DAAC                     |
| Availability time scale               | Within a day of acquisition |
| Estimates of data quantity (total)    | 4TB                         |
| Product delivery                      | ftp                         |
| Data reliability                      | Two satellites in orbit.    |
| Pricing                               | Free                        |
| Access conditions                     | User registration           |
| Formal agreements with data suppliers | None                        |

## 7.5. MYD11\_L2

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | MYD11_L2  |
| Data type                            | Satellite: retrieved LST  |
| Source                               | ESA   |
| URLs                                 | <a href="https://modis.gsfc.nasa.gov/data/dataproduct/mod11.php">https://modis.gsfc.nasa.gov/data/dataproduct/mod11.php</a> |
| Version                              | 6.1   |
| Platform name and characteristics    | Aqua  |
| Platform characteristics             | Sun-synchronous polar orbits  |
| Sensor(s) name(s)                    | MODIS   |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 36 channels in the visible and IR.  |
| References                           | [RD-38], [RD-39]  |
| Data format                          | HDF-EOS   |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km                                  |
| Data coverage: temporal              | 2002 - present  |
| Data coverage: spatial               | Global  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 2002 – 2023) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 2002-2023                                 |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 60 |
|--|--|--|

### Data quality

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | [RD-38] , [RD-39]  |
| Data validation            | [RD-39]  |
| Product limitations        | [RD-39]<br>In January 2022, Aqua began its constellation exit, by stopping all manoeuvres except collision avoidance manoeuvres, and will drift and exceed a 1:45 LECT crossing in February 2023 from its nominal LECT of 1:30 |
| Potential product upgrades | MODIS L2 Collection 6.1 is expected during the lifetime of the project.  |

### Data availability

| Variable                              | Description                 |
|---------------------------------------|-----------------------------|
| Available from                        | LP DAAC                     |
| Availability time scale               | Within a day of acquisition |
| Estimates of data quantity (total)    | 4TB                         |
| Product delivery                      | ftp                         |
| Data reliability                      | Two satellites in orbit.    |
| Pricing                               | Free                        |
| Access conditions                     | User registration           |
| Formal agreements with data suppliers | None                        |

## 7.6. LSA SAF MLST

| Variable                             | Description   |
|--------------------------------------|---|
| Product Name                         | LSA SAF MLST  |
| Data type                            | Satellite: retrieved LST  |
| Source                               | EUMETSAT  |
| URLs                                 | <a href="https://landsaf.ipma.pt/en/products/land-surface-temperature/lst/">https://landsaf.ipma.pt/en/products/land-surface-temperature/lst/</a> |
| Version                              | N/A   |
| Platform name and characteristics    | MSG 2 and 3   |
| Platform characteristics             | Geostationary orbit   |
| Sensor(s) name(s)                    | SEVIRI  |
| Sensor type                          | Visible and IR radiometer   |
| Sensor key technical characteristics | 12 spectral channels, 1 km resolution in high resolution visible channel, 3 km in other visible channels  |
| References                           | [RD-21], [RD-22], [RD-23]   |
| Data format                          | HDF5  |
| Data grid                            | Rectangular grid centred on instrument ground track, approximate resolution is 1 km x 1 km  |
| Data coverage: temporal              | 2005 - present  |
| Data coverage: spatial               | 79° W to 79° E longitude, 81° S to 81° N latitude   |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 61 |
|--|--|--|

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 2005 – 2023) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 2005-2023                                 |

### Data quality

| Variable                   | Description  |
|----------------------------|--|
| Data calibration           | Contained in the Algorithm Theoretical Basis Document (ATBD) and the Validation Report (VR) available from <a href="https://landsaf.ipma.pt/documentsView.jsp">https://landsaf.ipma.pt/documentsView.jsp</a> |
| Data validation            |  |
| Product limitations        |  |
| Potential product upgrades | None identified  |

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | LSA SAF   |
| Availability time scale               | Within 1 hour of last observation.  |
| Estimates of data quantity (total)    | 1TB   |
| Product delivery                      | EUMETCast or FTP transfer   |
| Data reliability                      | Produced in a Near Real Time operational environment with a committed performance threshold of 95% per month. The reliability can be checked in the latest Operations Semester Reports (OSR). |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

## 7.7. CM SAF TCDR (LTP and LTS products)

| Variable                             | Description  |
|--------------------------------------|--|
| Product Name                         | CM SAF TCDR (LTP and LTS products)   |
| Data type                            | Satellite: retrieved LST   |
| Source                               | ESA  |
| URLs                                 | <a href="https://www.cmsaf.eu/EN/Home/home_node.html">https://www.cmsaf.eu/EN/Home/home_node.html</a>  |
| Version                              | 1.0  |
| Platform name and characteristics    | MFG and MSG  |
| Platform characteristics             | Geostationary orbit  |
| Sensor(s) name(s)                    | MVIRI and SEVIRI   |
| Sensor type                          | Visible and IR radiometer  |
| Sensor key technical characteristics | MVIRI has three visible and IR channels: 0.70 µm, 6.40 µm, 11.5 µm. SEVIRI has 12 spectral channels, 1 km resolution in high resolution visible channel, 3 km in other visible channels. |
| References                           | [RD-28]  |
| Data format                          | NetCDF   |
| Data grid                            | Equal angle 0.05x0.05 degree grid.   |
| Data coverage: temporal              | 1995 - present   |
| Data coverage: spatial               | MSG full disk (includes Europe, Africa, and the Atlantic Ocean).   |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 1995 – 2023) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 1995-2023                                 |

### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data calibration           | [RD-28]         |
| Data validation            | [RD-29]         |
| Product limitations        | None Identified |
| Potential product upgrades | None Identified |

## Data availability

| Variable                              | Description                        |
|---------------------------------------|------------------------------------|
| Available from                        | CM SAF                             |
| Availability time scale               | Currently available to 2015        |
| Estimates of data quantity (total)    | Currently 43GB                     |
| Product delivery                      | HTTPS/SFTP from CM SAF data server |
| Data reliability                      | No redundancy                      |
| Pricing                               | Free                               |
| Access conditions                     | User registration                  |
| Formal agreements with data suppliers | None                               |

## 7.8. ISCCP DX

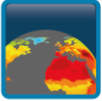

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ISCCP   |
| Data type                | Combined satellite: retrieved LST   |
| Source                   | WCRP  |
| URLs                     | <a href="https://isccp.giss.nasa.gov/">https://isccp.giss.nasa.gov/</a>                       |
| Version                  | 1.0   |
| Analysis characteristics | Combination of imaging radiometer data from GEO and LEO satellites e.g. AVHRR and GOES Imager |
| References               | [RD-26]   |
| Data format              | HDF   |
| Data grid                | Approximately 30 km resolution.   |
| Data coverage: temporal  | 1983 - 2009   |
| Data coverage: spatial   | Global  |

## Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q2 2019  |
| Use within project           | (7) intercomparison (require all available data for 1995 – 2009) |
| Reason for selection         | Product for intercomparison with LST ECVs                        |
| Temporal coverage required   | All available data for 1995-2009                                 |

## Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data calibration           | None identified. |
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

|  |  |  |

## 8. Ancillary Data

This section contains further information about the data products that will be used as ancillary data in the ECV production. The information is displayed in the form of tables: one table for each product. Definitions of the table fields are given in Section 3.

### 8.1. ERA5

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ERA5  |
| Data type                | NWP model forecast and analysis fields  |
| Source                   | ECMWF   |
| URLs                     | <a href="https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era5">https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era5</a> |
| Version                  | <a href="#">Earth System model IFS</a> , cycle 41r2   |
| Analysis characteristics | Model data  |
| References               | See ERA5 documentation at <a href="https://confluence.ecmwf.int/display/CKB/What+is+ERA5">https://confluence.ecmwf.int/display/CKB/What+is+ERA5</a>                                       |
| Data format              | NetCDF and GRIB   |
| Data grid                | 31 km grid  |
| Data coverage: temporal  | 1979 - present  |
| Data coverage: spatial   | Global  |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q4 2018  |
| Use within project           | (1) LST ECVs; (5) MMDB and algorithm selection; and (7) intercomparison. Require all available data for 1995 – 2023. |
| Reason for selection         | Long-term consistent reanalysis dataset  |
| Temporal coverage required   | All available data for 1995-2023   |

#### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

|  |  |  |
|--|--|--|

|--|--|--|

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | ECMWF, Copernicus Data Service                                    |
| Availability time scale               | Archive updated monthly, 3 months behind real-time                |
| Estimates of data quantity (total)    | 6TB   |
| Product delivery                      | Via scripts from ECMWF WebAPI or the Copernicus Data Service API. |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

## 8.2. ERA-Interim

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ERA-Interim   |
| Data type                | NWP model forecast and analysis fields  |
| Source                   | ECMWF   |
| URLs                     | <a href="https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era-interim">https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era-interim</a> |
| Version                  | <a href="#">Earth System model IFS</a> , cycle 31r2   |
| Analysis characteristics | Model data  |
| References               | [RD-27]   |
| Data format              | NetCDF and GRIB   |
| Data grid                | 80 km grid  |
| Data coverage: temporal  | 1979 - present  |
| Data coverage: spatial   | Global  |

### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 1995 – 2023) |
| Reason for selection         | Long-term consistent reanalysis dataset                   |
| Temporal coverage required   | All available data for 1995-2023                          |

### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | [RD-27]          |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 67 |
|--|--|--|

#### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | CEDA Archive  |
| Availability time scale               | Archive updated monthly, 2 months behind real-time          |
| Estimates of data quantity (total)    | 114TB   |
| Product delivery                      | Direct access from the CEDA Archive or download from ECMWF. |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

### 8.3. Copernicus Global Land Service FCOVER dataset

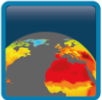

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | Copernicus Global Land Service FCOVER dataset   |
| Data type                | Fractional Vegetation Cover   |
| Source                   | Copernicus  |
| URLs                     | <a href="https://land.copernicus.eu/global/products/fcover">https://land.copernicus.eu/global/products/fcover</a> |
| Version                  | 2.0   |
| Analysis characteristics | Gap filled analysis of SPOT-VGT and PROBA-V satellite data.   |
| References               |   |
| Data format              | NetCDF and GeoTiff  |
| Data grid                | 1 km  |
| Data coverage: temporal  | 2016 - present  |
| Data coverage: spatial   | Global  |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 2016 – 2023)           |
| Reason for selection         | Auxiliary Fraction of Vegetation Cover data for input into LST ECVs |
| Temporal coverage required   | All available data for 2016-2023                                    |

#### Data quality

| Variable                   | Description   |
|----------------------------|---|
| Data validation            | <a href="https://land.copernicus.eu/global/sites/cgls.vito.be/files/products/CGLOPS1_SQE2017_LAI1km-V1%26V2_I1.10.pdf">https://land.copernicus.eu/global/sites/cgls.vito.be/files/products/CGLOPS1_SQE2017_LAI1km-V1%26V2_I1.10.pdf</a> |
| Product limitations        | None identified   |
| Potential product upgrades | None  |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 68 |
|--|--|--|

#### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | Copernicus Global Land Services                             |
| Availability time scale               | Within 3 days after end of synthesis period.                |
| Estimates of data quantity (total)    | 530GB   |
| Product delivery                      | FTP or direct download from Copernicus Global Land Services |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

### 8.4. Copernicus Global Land Service NDVI dataset

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | Copernicus Global Land Service NDVI dataset  |
| Data type                | Normalized Difference Vegetation Index   |
| Source                   | Copernicus   |
| URLs                     | <a href="https://land.copernicus.eu/global/products/ndvi">https://land.copernicus.eu/global/products/ndvi</a>  |
| Version                  | 2.0  |
| Analysis characteristics | Rescaled standard 10-day synthesis of PROBA-V satellite data. Pixels wrongly identified as "land" in the S10 NDVI status map are re-classified as "sea". |
| References               |  |
| Data format              | NetCDF and GeoTiff   |
| Data grid                | 1 km   |
| Data coverage: temporal  | 1998 - present   |
| Data coverage: spatial   | Global   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 1998 – 2023) |
| Reason for selection         | Auxiliary NDVI data for input into LST ECVs               |
| Temporal coverage required   | All available data for 1998-2023                          |

#### Data quality

| Variable            | Description     |
|---------------------|-----------------|
| Data validation     |                 |
| Product limitations | None identified |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 69 |
|--|--|--|

|                            |      |
|----------------------------|------|
| Potential product upgrades | None |
|----------------------------|------|

#### Data availability

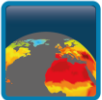

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | Copernicus Global Land Services                             |
| Availability time scale               | Within 3 days after end of synthesis period.                |
| Estimates of data quantity (total)    | 8GB   |
| Product delivery                      | FTP or direct download from Copernicus Global Land Services |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

### 8.5. UW/CIMSS Baseline Fit Global Infrared Land Surface Emissivity Database

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | UW/CIMSS Baseline Fit Global Infrared Land Surface Emissivity Database   |
| Data type                | Emissivity product   |
| Source                   | CIMSS  |
| URLs                     | <a href="http://cimss.ssec.wisc.edu/iremis/">http://cimss.ssec.wisc.edu/iremis/</a>  |
| Version                  | 3.0  |
| Analysis characteristics | Derived by fitting monthly averaged MODIS Aqua level 3 operational land surface emissivity product values to a baseline emissivity spectra determined using laboratory measurements of land surface materials. |
| References               | [RD-24]  |
| Data format              | NetCDF   |
| Data grid                | 0.05°  |
| Data coverage: temporal  | 2003 - 2016  |
| Data coverage: spatial   | Global   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 2003 – 2016) |
| Reason for selection         | Auxiliary emissivity data for input into LST ECVs         |
| Temporal coverage required   | All available data for 2003-2016                          |

|  |  |  |
|--|--|--|

|--|--|--|

#### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

#### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | CIMSS   |
| Availability time scale               | All available   |
| Estimates of data quantity (total)    | 7GB   |
| Product delivery                      | ftp access from <a href="http://cimss.ssec.wisc.edu/iremish/">http://cimss.ssec.wisc.edu/iremish/</a> |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

## 8.6. MEaSURES CAMEL Broadband Emissivity Product

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | MEaSURES CAMEL Broadband Emissivity Product   |
| Data type                | Emissivity product  |
| Source                   | CIMSS   |
| URLs                     | <a href="http://cimss.ssec.wisc.edu/iremish/">http://cimss.ssec.wisc.edu/iremish/</a> |
| Version                  | 2.0   |
| Analysis characteristics | Combined ASTER MODIS Emissivity over Land   |
| References               | [RD-18]   |
| Data format              | NetCDF  |
| Data grid                | 0.05°   |
| Data coverage: temporal  | 2000-2016   |
| Data coverage: spatial   | Global  |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 2000 – 2016) |
| Reason for selection         | Auxiliary emissivity data for input into LST ECVs         |
| Temporal coverage required   | All available data for 2000-2016                          |

### Data quality

| Variable                   | Description                         |
|----------------------------|-------------------------------------|
| Data validation            | None identified.                    |
| Product limitations        | None identified.                    |
| Potential product upgrades | Eventually will be extended to 2017 |

### Data availability

| Variable                              | Description          |
|---------------------------------------|----------------------|
| Available from                        | CIMSS                |
| Availability time scale               | Updated periodically |
| Estimates of data quantity (total)    | 10GB                 |
| Product delivery                      | https from LP DAAC   |
| Data reliability                      | N/A                  |
| Pricing                               | Free                 |
| Access conditions                     | User registration    |
| Formal agreements with data suppliers | None                 |

## 8.7. ECOSTRESS (formally ASTER) spectral library

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | ECOSTRESS spectral library   |
| Data type                | Spectral library   |
| Source                   | NASA JPL   |
| URLs                     | <a href="https://speclib.jpl.nasa.gov/">https://speclib.jpl.nasa.gov/</a>  |
| Version                  | 1.0  |
| Analysis characteristics | A collection of over 2300 spectra of a natural and man-made materials covering the wavelength range 0.4–15.4 $\mu\text{m}$ . |
| References               | [RD-19], [RD-20]   |
| Data format              | Text files   |
| Data grid                | N/A  |
| Data coverage: temporal  | N/A  |
| Data coverage: spatial   | N/A  |

### Product requirements

| Variable                     | Description                                       |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs                                      |
| Reason for selection         | Auxiliary emissivity data for input into LST ECVs |
| Temporal coverage required   | All available                                     |

|  |  |  |
|--|--|--|

|--|--|--|

#### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

#### Data availability

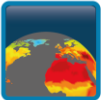

| Variable                              | Description                   |
|---------------------------------------|-------------------------------|
| Available from                        | NASA JPL                      |
| Availability time scale               | All available                 |
| Estimates of data quantity (total)    | 6GB                           |
| Product delivery                      | Direct download from NASA JPL |
| Data reliability                      | N/A                           |
| Pricing                               | Free                          |
| Access conditions                     | None                          |
| Formal agreements with data suppliers | None                          |

### 8.8. The Interactive Multisensor Snow and Ice Mapping System (IMS) Daily Northern Hemisphere Snow and Ice Analysis

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | The Interactive Multisensor Snow and Ice Mapping System (IMS) Daily Northern Hemisphere Snow and Ice Analysis   |
| Data type                | Transient snow cover dataset  |
| Source                   | US NSIDC  |
| URLs                     | <a href="https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era-interim">https://www.ecmwf.int/en/forecasts/datasets/archive-datasets/reanalysis-datasets/era-interim</a> |
| Version                  | 1.3   |
| Analysis characteristics | Derived by analysts using a mixture of satellite and in situ data.  |
| References               | [RD-30], [RD-31]  |
| Data format              | ASCII and GeoTIFF   |
| Data grid                | 1 km, 4km and 24 km EASE-grid (dependant on time period)  |
| Data coverage: temporal  | 1997 - present  |
| Data coverage: spatial   | Northern hemisphere   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 1997 – 2023)   |
| Reason for selection         | Auxiliary seasonal snow cover data for input into LST ECVs. |
| Temporal coverage required   | All available data for 1997-2023                            |

|  |  |  |
|--|--|--|
|  <b>land surface temperature</b><br>cci | <b>Data Access Requirements Document</b><br><i>WP1.3 – DEL-1.3</i> | Ref.: LST-CCI-D1.3-DARD<br>Version: 3.0<br>Date: 15-Nov-2022<br>Page: 73 |
|--|--|--|

### Data quality

| Variable                   | Description |
|----------------------------|-------------|
| Data validation            | [RD-32]     |
| Product limitations        | [RD-31]     |
| Potential product upgrades | None        |

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | NSIDC   |
| Availability time scale               | Updated daily   |
| Estimates of data quantity (total)    | 10GB  |
| Product delivery                      | FTP from NSIDC  |
| Data reliability                      | The IMS product is considered operational, but OSDPD does not guarantee availability or timely delivery of data via the OSDPD Web server, and NSIDC does not guarantee availability of this product via the NSIDC Web server. |
| Pricing                               | Free  |
| Access conditions                     | None identified   |
| Formal agreements with data suppliers | None  |

## 8.9. SRTM DEM

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | SRTM DEM   |
| Data type                | Digital Elevation Model  |
| Source                   | USGS   |
| URLs                     | <a href="https://www2.jpl.nasa.gov/srtm/index.html">https://www2.jpl.nasa.gov/srtm/index.html</a><br><a href="ftp://e0srp01u.ecs.nasa.gov/srtm/">ftp://e0srp01u.ecs.nasa.gov/srtm/</a> |
| Version                  | 2.0  |
| Analysis characteristics | Data from the SRTM <a href="#">radar</a> system that flew on board the <a href="#">Space Shuttle Endeavour</a> .   |
| References               | [RD-33]  |
| Data format              | DEM File (.HGT)  |
| Data grid                | 30 arc-seconds   |
| Data coverage: temporal  | 2000   |
| Data coverage: spatial   | Global   |

|  |  |  |
|--|--|--|

|--|--|--|

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Q4 2018  |
| Use within project           | (1) LST ECVs (require all available data for 2000) |
| Reason for selection         | Auxiliary elevation data for input into LST ECVs.  |
| Temporal coverage required   | All available data for 2000                        |

### Data quality

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | USGS EROS Center  |
| Availability time scale               | All available   |
| Estimates of data quantity (total)    | 472MB   |
| Product delivery                      | Download from <a href="https://dds.cr.usgs.gov/srtm/">https://dds.cr.usgs.gov/srtm/</a> |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | None identified.  |
| Formal agreements with data suppliers | None  |

## 8.10. UOL ATSR LST Biome Classification data

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | UOL ATSR LST Biome Classification data   |
| Data type                | Biome classification data  |
| Source                   | UOL  |
| URLs                     | None   |
| Version                  | 2.0  |
| Analysis characteristics | A variant of the 2006 GlobCover product [RD-36] which includes modifications for Antarctic permanent ice classification, distinction between inland/coastal water and open ocean, and partition of a single bare soil class into the most dominant soil types. |
| References               | [RD-34]  |
| Data format              | NetCDF   |
| Data grid                | 0.01°, 0.05°   |
| Data coverage: temporal  | Static   |
| Data coverage: spatial   | Global   |

|  |  |  |
|--|--|--|

|--|--|--|

### Product requirements

| Variable                     | Description                     |
|------------------------------|---------------------------------|
| Date required within project | Q4 2018                         |
| Use within project           | (1) LST ECVs                    |
| Reason for selection         | Auxiliary biome classification. |
| Temporal coverage required   | All available                   |

### Data quality

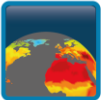

| Variable                   | Description      |
|----------------------------|------------------|
| Data validation            | None identified. |
| Product limitations        | None identified. |
| Potential product upgrades | None             |

### Data availability

| Variable                              | Description      |
|---------------------------------------|------------------|
| Available from                        | UOL              |
| Availability time scale               | All available    |
| Estimates of data quantity (total)    | 1.7TB            |
| Product delivery                      |                  |
| Data reliability                      | N/A              |
| Pricing                               | Free             |
| Access conditions                     | None identified. |
| Formal agreements with data suppliers | N/A              |

## 8.11. ASTER Global Emissivity Dataset

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ASTER Global Emissivity Dataset (GED)   |
| Data type                | Global emissivity data  |
| Source                   | NASA JPL  |
| URLs                     | <a href="https://lpdaac.usgs.gov/dataset_discovery/community/community_products_table">https://lpdaac.usgs.gov/dataset_discovery/community/community_products_table</a>   |
| Version                  | 3.0   |
| Analysis characteristics | ASTER GED land surface temperature and emissivity data products are generated using the ASTER Temperature Emissivity Separation algorithm, with a Water Vapour Scaling atmospheric correction method using MODIS atmospheric profiles and the MODTRAN radiative transfer model. This dataset is computed from all clear-sky pixels of ASTER scenes acquired from 2000 – 2008. |
| References               | [RD-40]   |
| Data format              | HDF and binary  |
| Data grid                | 100 m   |
| Data coverage: temporal  | Static  |
| Data coverage: spatial   | Global  |

## 9. Outputs from other CCI projects

This section contains information about the CCI outputs from other CCI projects that may be used in the LST\_CCI project. Whether or not a product is used will depend on the particular product's final specification and availability. The information is displayed in the form of tables: one table for each product. Definitions of the table fields are given in Section 3.

### 9.1. ESA CCI Global Land Cover Maps

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ESA CCI Land Cover Global LC maps   |
| Data type                | Land cover dataset  |
| Source                   | ESA   |
| URLs                     | <a href="https://www.esa-landcover-cci.org/">https://www.esa-landcover-cci.org/</a>   |
| Version                  | 1.0   |
| Analysis characteristics | MERIS and SPOT-VGT satellite data global surface reflectance composite time series.   |
| References               | <a href="http://data.ceda.ac.uk/neodc/esacci/land_cover/docs/ESACCI-LC-PUG-v2.5.pdf">http://data.ceda.ac.uk/neodc/esacci/land_cover/docs/ESACCI-LC-PUG-v2.5.pdf</a> |
| Data format              | NetCDF  |
| Data grid                | 300m  |
| Data coverage: temporal  | 1992-2015   |
| Data coverage: spatial   | Global  |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q4 2018   |
| Use within project           | (1) LST ECVs (require all available data for 1995-2015) |
| Reason for selection         | Long-term consistent reanalysis dataset                 |
| Temporal coverage required   | All available data for 1995-2015                        |

#### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data validation            | None identified |
| Product limitations        | None identified |
| Potential product upgrades | None            |

### Data availability

| Variable                              | Description  |
|---------------------------------------|--|
| Available from                        | CCI Data Portal  |
| Availability time scale               | All available.   |
| Estimates of data quantity (total)    | 10TB   |
| Product delivery                      | On request. Contact <a href="mailto:contact@esa-landcover-cci.org">contact@esa-landcover-cci.org</a> |
| Data reliability                      | N/A  |
| Pricing                               | Free   |
| Access conditions                     | On request.  |
| Formal agreements with data suppliers | None   |

## 9.2. ESA CCI+ Water Vapour products

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ESA CCI+ Water Vapour products  |
| Data type                | Water vapour datasets   |
| Source                   | ESA   |
| URLs                     | <a href="http://cci.esa.int/watervapour">http://cci.esa.int/watervapour</a> |
| Version                  | Unknown   |
| Analysis characteristics | Unknown   |
| References               | None identified yet   |
| Data format              | Unknown   |
| Data grid                | Unknown   |
| Data coverage: temporal  | Unknown   |
| Data coverage: spatial   | Unknown   |

### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Phase 2  |
| Use within project           | (1) LST ECVs   |
| Reason for selection         | Auxiliary water vapour data for input into LST ECVs. |
| Temporal coverage required   | Unknown  |

### Data quality

| Variable                   | Description         |
|----------------------------|---------------------|

#### Data availability

| Variable                              | Description                                    |
|---------------------------------------|--|
| Available from                        | CCI Data Portal                                |
| Availability time scale               | Expected to become available by end of Phase 1 |
| Estimates of data quantity (total)    | Unknown  |
| Product delivery                      | Unknown  |
| Data reliability                      | N/A  |
| Pricing                               | Free   |
| Access conditions                     | User registration                              |
| Formal agreements with data suppliers | None   |

### 9.3. ESA CCI+ Snow products

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ESA CCI+ Snow products  |
| Data type                | Transient snow cover datasets   |
| Source                   | ESA   |
| URLs                     | <a href="http://cci.esa.int/node/274/">http://cci.esa.int/node/274/</a> |
| Version                  | Unknown   |
| Analysis characteristics | Unknown   |
| References               | None identified yet   |
| Data format              | Unknown   |
| Data grid                | Unknown   |
| Data coverage: temporal  | Unknown   |
| Data coverage: spatial   | Unknown   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Phase 2   |
| Use within project           | (1) LST ECVs  |
| Reason for selection         | Auxiliary seasonal snow cover data for input into LST ECVs. |
| Temporal coverage required   | Unknown   |

#### Data quality

| Variable                   | Description         |
|----------------------------|---------------------|
| Data validation            | None identified yet |
| Product limitations        | None identified yet |
| Potential product upgrades | None                |

|--|--|--|

#### Data availability

| Variable                              | Description                                    |
|---------------------------------------|--|
| Available from                        | CCI Data Portal                                |
| Availability time scale               | Expected to become available by end of Phase 1 |
| Estimates of data quantity (total)    | Unknown  |
| Product delivery                      | Unknown  |
| Data reliability                      | N/A  |
| Pricing                               | Free   |
| Access conditions                     | User registration                              |
| Formal agreements with data suppliers | None   |

### 9.4. ESA CCI+ Lakes Lake Surface Temperature products

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ESA CCI+ Lake Surface Temperature products            |
| Data type                | Lake Surface Temperature datasets                     |
| Source                   | ESA   |
| URLs                     | <a href="http://cci.esa.int/">http://cci.esa.int/</a> |
| Version                  | Unknown   |
| Analysis characteristics | Unknown   |
| References               | None identified yet                                   |
| Data format              | Unknown   |
| Data grid                | Unknown   |
| Data coverage: temporal  | Unknown   |
| Data coverage: spatial   | Unknown   |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Phase 2  |
| Use within project           | (1) LST ECVs   |
| Reason for selection         | Auxiliary lake surface water data for input into LST ECVs. |
| Temporal coverage required   | Unknown  |

#### Data quality

| Variable                   | Description         |
|----------------------------|---------------------|
| Data validation            | None identified yet |
| Product limitations        | None identified yet |
| Potential product upgrades | None                |

#### Data availability

| Variable                              | Description                                    |
|---------------------------------------|--|
| Available from                        | CCI Data Portal                                |
| Availability time scale               | Expected to become available by end of Phase 1 |
| Estimates of data quantity (total)    | Unknown  |
| Product delivery                      | Unknown  |
| Data reliability                      | N/A  |
| Pricing                               | Free   |
| Access conditions                     | User registration                              |
| Formal agreements with data suppliers | None   |

## 9.5. ESA CCI Aerosol Products

| Variable                 | Description  |
|--------------------------|--|
| Product Name             | ESA CCI Aerosol products   |
| Data type                | Aerosol optical depth datasets   |
| Source                   | ESA  |
| URLs                     | <a href="http://www.esa-aerosol-cci.org/">http://www.esa-aerosol-cci.org/</a>  |
| Version                  | 4.3  |
| Analysis characteristics | ATSR-2 and AATSR Level 3 Daily Aerosol AER data produced by Swansea University |
| References               | <a href="http://www.esa-aerosol-cci.org/">http://www.esa-aerosol-cci.org/</a>  |
| Data format              | NetCDF   |
| Data grid                | 1° equal angle grid  |
| Data coverage: temporal  | 1995 to 2012   |
| Data coverage: spatial   | Global   |

#### Product requirements

| Variable                     | Description   |
|------------------------------|---|
| Date required within project | Q2 2019   |
| Use within project           | (1) LST ECVs (require all available data for 1995-2012)       |
| Reason for selection         | Auxiliary aerosol optical depth data for input into LST ECVs. |
| Temporal coverage required   | All available data for 1995-2012                              |

#### Data quality

| Variable                   | Description     |
|----------------------------|-----------------|
| Data validation            | None identified |
| Product limitations        | None identified |
| Potential product upgrades | None identified |

#### Data availability

| Variable                              | Description   |
|---------------------------------------|---|
| Available from                        | CCI Data Portal or ftp from <a href="ftp.icare.univ-lille1.fr">ftp.icare.univ-lille1.fr</a> |
| Availability time scale               | Unknown   |
| Estimates of data quantity (total)    | Unknown   |
| Product delivery                      | ftp from <a href="ftp.icare.univ-lille1.fr">ftp.icare.univ-lille1.fr</a>                    |
| Data reliability                      | N/A   |
| Pricing                               | Free  |
| Access conditions                     | User registration   |
| Formal agreements with data suppliers | None  |

## 9.6. ESA CCI+ High Resolution Land Cover data

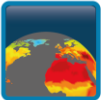

| Variable                 | Description   |
|--------------------------|---|
| Product Name             | ESA CCI+ High Resolution Land Cover data              |
| Data type                | High resolution land cover data                       |
| Source                   | ESA   |
| URLs                     | <a href="http://cci.esa.int/">http://cci.esa.int/</a> |
| Version                  | Unknown   |
| Analysis characteristics | Unknown   |
| References               | None identified yet                                   |
| Data format              | Unknown   |
| Data grid                | Unknown   |
| Data coverage: temporal  | Unknown   |
| Data coverage: spatial   | Unknown   |

#### Product requirements

| Variable                     | Description  |
|------------------------------|--|
| Date required within project | Phase 2  |
| Use within project           | (1) LST ECVs   |
| Reason for selection         | Auxiliary high resolution land cover data for input into LST ECVs. |
| Temporal coverage required   | Unknown  |

#### Data quality

| Variable                   | Description         |
|----------------------------|---------------------|
| Data validation            | None identified yet |
| Product limitations        | None identified yet |
| Potential product upgrades | None                |
